

Boost your Development with the Ultimate GUI Tools for Microcontrollers

Flowcode 4 is one of the World's most advanced graphical programming languages for microcontrollers. The great advantage of Flowcode is that it allows those with little experience to create complex electronic systems in minutes. Flowcode currently supports the PICmicro, AVR and ARM series of microcontrollers.

e BLOCKS®
LEARN • DESIGN • BUILD

E-Blocks are small circuit boards each of which contains a block of electronics that you would typically find in an electronic or embedded system. There are More than 40 separate circuit boards in the range; from simple LED boards to more complex boards like device programmers, Bluetooth and TCP/IP. E-blocks can be snapped together to form a wide variety of systems that can be used for teaching/learning electronics and for the rapid prototyping of complex electronic systems.

- ▶ E-blocks Mobile Comms System
- ▶ E-blocks CAN Training Solution
- ▶ Zigbee Solution
- ▶ LIN BUS Solution
- ▶ Embedded Internet solution
- ▶ RFID Solution
- ▶ E-Blocks Bluetooth Training Solution
