

Cut down your Dev time Dramatically

Tibbo Technologies, Taiwan introduces a powerful range of cost-effective, easy-to-use, Basic-Programmable Modules/Controllers with loads of software features, that can greatly reduce your development time.

Basic Programmable Controllers

Simple Language

High-Level Objects

Lean, Mean OS

Streamlined Environment

Comprehensive Libraries

Versatile Hardware

- Simple programming language - Tibbo BASIC
- Event driven programming
- Integrated development system (TIDE) available - **FREE**
 - Helps development, debugging, complying & programming without any additional hardware
- Has lots of high level objects (like ethernet, serial) - Frees the user to concentrate on application rather than "house keeping"
- Built on our own OS. No Royalty or Licence fee
- New devices to be added continuously
- Many ready application samples available on our website

■ Hardware Details

- Upto 4 serial ports
- Ethernet 100 BaseT Port (Built in TCP/UDP stacks)
- Upto 49 DIO Lines
- Real Time Clock
- 1024k Flash Disk
- 2k EEPROM

- Development systems available in stock - can be loaned to you for Evaluation
- We also undertake development of your applications
- Compliance with RoHS and WEEE
- CE & FCC-approved

For more information OR to download TIDE - visit www.tibbo.com
