FALCON Introducing Basic Electronics Trainers

COT-01 : Discrete Components Trainer - To study characteristics of basic discrete semiconductor devices, like Diodes, BJT, FET, MOSFET, UJT, PUT, DIAC, TRIAC, SCR, IGBT etc.

OPT-01 : OP-AMP Trainer - To study characteristics of Op-Amp and its various applications.

LIT-01: Linear IC Trainer - Covers wide range of analog applications using monolithic ICs; like Op-Amp, PLL, Function Generator, Opto Coupler and Regulators

DIT-01 : Digital IC Trainer - Covers topics on all basic Logic Gates, Universal Gates, Flip-Flops, Counters, Registers, Multiplexers, De-multiplexers, Seven Segment display, Parity Generator / Checker and Code Converters.

Our Product Range

Telecommunication Trainers

- Wireless Communication
- Data Communication
- Digital Communication
- Fiber Optics
- Analog communication
- Telephony
- Network Laboratory
- Antenna, Radar and Satellite

Test & Measuring Instruments

- Digital Multimeters & Calibrators
- Meters and Testers
- Function Generators
- Analog Oscilloscopes
- Digital Storage Oscilloscopes
- Analyzers
- Power Supplies

VLSI & Embedded Training Boards

- CPLD Training Boards
- FPGA Training Boards
- DSP in VLSI Training Boards
- Embedded Training System

(Dealers & distributors welcome. Required: Experienced people for handling the sales & service of Test & Measuring Instruments.)
