Service to manage digital social life of mobile users

IMImobile has launched DaVinci Social—a white-labeled service that will enable people to easily manage their mobile digital social life. With this, users can get immediate access to all of their communications, social networks and communities and ensure that their content and contacts are safe, all from one place on their mobile. The service uses IMImobile's flexible and modular open API DaVinci technology.

Interactive Web services at Samsung Apps

Nagravision in partnership with Samsung Electronics America will provide TV applications for more interactive Web services and video content at Samsung Apps, the world's first HDTV-based application store where users can download and purchase applications. According to Yves Pitton, SVP-corporate development at Nagravision, accessing personalised applications will enable consumers to discover a richer TV experience.

Anti-virus with advanced protection

K7 Computing has released TotalSecurity Version 10.0—an Internet security software with advanced protection features to safeguard users from multitude of varied Internet threats. The software provides multi-layered defence to the PC users. The pre-installation super scanner tool detects and eliminates threats even before the installation of the main package—taking security to the next level.

Virgin Mobile launches GSM services in Maharashtra

Virgin Mobile India has launched GSM services in Maharashtra, post the successful launch in five southern circles and Orissa. The company's pan-India service rollout will be completed by the end of this financial year. For now, consumers across Maharashtra and Mumbai circle will be offered a differentiated tariff proposition of 20 paise/minute for STD and local calls to any Virgin Mobile number without any pack. Virgin Mobile customers calling any other network will be charged at 40 paise/minute for local and 50 paise/minute for STD calls again without any pack.

PVC-FREE NOTEBOOK

HCL INFOSYSTEM'S ME SERIES 40 NOTEBOOK IS FULLY RECYCLABLE AND TOXIN-FREE

HCL Infosystems has unveiled India's first PVC-free notebook, making recycling of this product safer. The ME Series 40 is based on Intel

Price: Rs 41,500 plus taxes

Core2 Duo processor and is loaded with a host of innovative features like SPLIT ME, which allows one to share data without worrying about the file size; LOCK ME, which ensures that the data is not copied onto any external storage device, USB memory stick, CD optical disk drive and hard disk drive without getting authorisation from the user; Secure ME, which can be used to lock any application installed on the PC, for example, Internet browser, Adobe and PowerPoint; and Encrypt ME, which allows the user to encrypt data in order to prevent unauthorised access.

The notebook is available at all HCL stores throughout India.

GREEN LED MONITORS

VIEWSONIC'S NEW LED MONITORS ARE MERCURY-FREE AND MUCH SAFER FOR THE ENVIRONMENT

Price:
VX1932wm: Rs 8500
VA1601w: Rs 6300

consumption.

The 48.3cm VX-1932wm provides dynamic contrast ratio at 10,000,000:1 for true-to-life pictures. The mercury-free WLED backlight technology automatically detects the image signal and intelligently controls the backlight brightness. Image distortion is eliminated by maintaining correct image proportions for

both widescreen and native 4:3 content. The monitor also automatically adjusts the gray level.

The 39.6cm VA1601w consumes less than one watt in standby mode and not more than 10 watts in normal operation.

ViewSonic has launched two new LED monitors with less energy
