

PORTABLE MEDIA PLAYERS

The market is abuzz with portable media players. Microsoft, Sony, Apple, Philips and Samsung are some of the popular brands. The latest to join the fray are Moser Baer and Viewsonic. Take a look at what is a portable media player and what the major brands have on offer

■ UMA BANSAL

Movie and music lovers today have a choice of digital devices that can store and play thousands of songs and long hours of video. Called portable media players, or portable MP3 video players, these are lightweight similar to MP3 players and can be pocketed. The most advanced in this genre are digital portable movie players with which you can watch HD movies, listen to music, view photo albums, read digital books and record voice memos. Cellphones too are some sort of portable media players because of their playback capability.

Manufacturers are even looking at combining the phone function into their portable media player itself. One case in point is Microsoft's Windows Phone 7 series which is nothing but its Zune HD media player with a phone built-in. Some of the latest media players can even be hooked up to any PC or TV for full-sized entertainment at home.

Amongst 4GB models below Rs 5000 price-point, Philips GoGear is perhaps the only player that offers 30 hours of

Philips GoGear Opus SA10PS08K
