

Microsoft Zune Portable HD Media Player

- Size: 52.7×102.1×8.9 mm³
- Weight: 74 gm
- Storage: 16 GB, store up to 4000 songs, or five hours of high-definition video from Zune Marketplace, or 22 hours of video optimised for device, or 25,000 pictures
- Screen: 8.4cm (3.3-inch) OLED colour display, 16:9 aspect ratio, scratch-resistant glass with touch input capability, 480×272 pixels
- Battery life: Music, up to 33 hours (wireless off); video, up to 8.5 hours
- File format support: MP3, WMA, WMA Lossless, AAC-LC, FairPlay DRM, WMV, MPEG-4, H.264, DVR-MS, JPEG
- User interface/Connectivity: Wireless, 802.11b/g compatible
- FM: Yes, built-in FM/radio receiver
- USP: Built-in HD radio, OLED screen consumes less power

A 4GB capacity allows you to store up to 1000 songs. Flash (solidstate) memory is usually considered better than hard disk. Flash memory based players are lightweight compared to HDD-based ones. You can also wear them while jogging without affecting their performance.

ViewSonic has launched a series of media players having 8GB internal memory and an extendable Micro SD storage slot.

Screen. Movie players have bigger LCD screens and higher resolution for better viewing experience altogether. Usually, these use a colour liquid-crystal display (LCD) or organic light-emitting diode (OLED) screen. A screen size greater than 2.5 cm (2 inches) is preferred. Typically, LCD screen resolutions are QVGA and QQVGA. However, sizes as well as resolution may range all the way up to 17.8 cm (7 inches) and WVGA, respectively. Many players come with touch screen as a form of primary or alternative input.

Battery life. Typically, media players can play audio for 10-40 hours and video for 2-6 hours. Playing a video clip drains the battery life faster. The battery life is also affected by the loudness with which the music is played and even the brightness/contrast of the screen. Some players feature battery conservation techniques like a screen saver and auto shut-down.

File format support. Following are the general file formats for portable media players:

Photo formats: JPEG, BMP, PNG, GIF

Video formats: AVI, RM/RMVB, MP4, MOV, PMP, MPG, DAT, H.264, H.263, H.265

Audio formats: Almost all players

Viewsonic MovieBook VPD400

**Price
Rs 9,000**

- Size: 113×74.5×13.8 mm³
- Weight: 140 gm
- Storage space: 8 GB of internal memory with an extendable Micro SD storage slot
- Screen: 10.9cm (4.3-inch) active-matrix TFT-LCD, 800×480
- Battery life: Up to 12 hours of continuous audio, or 6 hours of video, or 3 hours of HD video
- File format support: JPEG, BMP, PNG, GIF, AVI, RM/RMVB, MP4, MOV, PMP, MPG, DAT, H.264, H.263, MP3, WMA, WAV, FLAC, APE, OGG
- User interface/Connectivity: USB 2.0 Slave
- USP: Extreme compatibility (supports a full range of video and audio formats including RM/RMVB) and intuitive user interface (on-screen icons plus remote control and easy-to-use memo option)
