

All About Consumer Gadgets & Power Electronics

Seeking information on how consumer gadgets work, what's new in renewable technologies or how to create a power supply? Check out the following websites

How Stuff Works

How Stuff Works is a good website to learn the basics of any electronics gadget. It is a commercial website that can be termed as an edutainment website. The site was created by Marshall Brain and is currently owned by Discovery Communications. It gives an easy understanding of how things work, in a simple layman's language. It contains information on various topics, including cameras and photography, gadgets, games and gear, home audio and video, how-to technology, personal audio, phones, solidstate electronics, tech myths and trade shows.

The site also hosts ten different blogs: Brainstuff, Fanstuff, High Speed Stuff, How-to Stuff, Keep Asking, Stuff From the Science Lab, Stuff You Missed in History Class, Stuff You Should Know, Techstuff and The Coolest Stuff on the Planet.
