

160 MW of Green Engineering

MEASURE IT - FIX IT

Since 2001, engineers at Siliken Renewable Energy have used the National Instruments graphical system design platform to produce solar panels generating 160 MW of renewable solar energy.

MEASURE IT

Acquire

Acquire and measure data from any sensor or signal

Analyze

Analyze and extract info with signal processing

Present

Present data with HMI's, Web interfaces and reports

FIX IT

Design

Design optimized control algorithms and systems

Prototype

Prototype designs on ready-to-run hardware

Deploy

Deploy to the hardware platform you choose

Siliken Renewable Energy, one of the world's fastest-growing manufacturers of solar panels, trusts NI LabVIEW software for applications ranging from research and development to automated test. Like Siliken, companies around the world implement the NI graphical system design platform to create environmentally friendly products, technologies, and processes. Using modular hardware and flexible software, they are not only testing and measuring existing systems but also creating innovative ways to fix the problems they find.
