Virgin Mobile slashes local call rates to half on GSM

Virgin Mobile India has introduced a pocket-friendly local calling pack for all its GSM subscribers. The Rs 45 pack offers calls to any local number at just one paisa per two seconds. It comes with a validity of 30 days and is available across Karnataka, Andhra Pradesh, Chennai, Tamil Nadu, Kerala, Orissa, Mumbai and Maharashtra circles. The benefits of this pack will be available to Virgin Mobile users on both minutes and seconds billing profiles.

FUJIFILM uses next-generation lenses in its digicams

Distortions of images and colours arise when light passes through the lens. To control the impact, FUJIFILM has produced ultra-precision lenses with its ultra-precision processing technology, making it possible to capture vivid

FUJINON lens from FUJIFILM

images with high resolution. The technology, which is used for satellite lenses, now enhances the ability of its digital cameras.

SMART GUARD launches 'made in India' IP surveillance products

Smart Guard Systems has launched cutting-edge 'designed in and for India' IP surveillance products. It is setting up India's first facility in Ahmedabad to manufacture IP cameras, digital video recorders (DVRs) and encoders. Smart Guard Systems has been set up as a wholly-owned subsidiary of eInfochips.

Planet Acer, the all-in-one store

Acer India has launched a concept store called 'Planet Acer' in the country's biggest mall Mantri Square at Bengaluru. This store provides extensive choice to its consumers by offering all the three mega brands—Acer, Gateway and eMachines—under one roof. It underpins Acer's strategy to spread its wings and reach out to its customers with suitable offerings.

SLIM EXTERNAL DVD WRITER

THE SLIM DESIGN OF KOBIAN IXA M890-AS DVD-RW MAKES IT A PERFECT COMPANION FOR NETBOOK USERS

Kobian has launched an external KDVD writer for people on the move. Designed to provide consistent performance, the IXA M890-AS DVD-RW uses a single interconnect cable for both data transmission and power supply through a single USB port. It weighs less than 400 gm, making it easy to carry as a portable device. A sleek glossy surface design sets this drive apart from the rest. The writer supports 8x DVR±RW write/rewrite speed and a 16x CD rewrite speed, and is compatible with a wide range of media.

The slim design of the writer

makes it a perfect companion for netbook users and also for regular desktop users who need the ease of a writer for their growing data storage requirements.

Price: Rs 2400

ULTRA-SPEED SOLIDSTATE DRIVE

STRONTIUM SWIFT CAN REACH 236MB/S READ AND 160MB/S WRITE SPEEDS

Strontium has launched a solidstate drive that delivers the advantages of Flash disk technology. Called Swift, this flash-based drive is designed as a drop-in replacement for traditional hard drives, and offers greater reliability and faster performance than traditional magnetic hard drives. It uses less power, has reduced heat dissipation, and is lightweight and more rugged. The drive features an industry-standard 1.5/3.0Gbps SATA/II interface and 6.4cm form factor to allow easy and straightforward user installation in most notebook and

desktop computers, just like a conventional hard drive. Moreover, it can reach 236MB/s read and 160MB/s write speeds.

Available in capacities of 32 GB to 256 GB, the Swift SSDs are an ideal solution for those who are looking for an easy upgrade to supercharge their notebook or desktop PC with a dose of ultra-speed performance. For notebook users, there is an added advantage of longer battery life. These are fully compliant with RoHS directive and support self-monitor analysis and reporting technology and dynamic and static wear leveling.
