Alcohol detector

KT Automation (India) has introduced an instant alcohol detector with printer from Sentech, Korea. The detector (model AL2000/AL6000) helps to identify whether a person is drunk or not,

and is useful for police, chemical plants, ports, pharmaceutical plants and

petrochemical complexes.

There is no need to use a mouth-piece. Indication is in ten steps from 0.00 to 0.10% BAC and up to ten tests can be performed in one minute. The detector weighs 125 gm and is powered by three 1.5V AAA-size alkaline battery.

Automatic insulation oil tester

Piyush Electronics and Electricals, also known as PACT, has launched a fully automatic insulation oil tester that accurately measures the breakdown voltage of insulating fluids used in transformers, circuit breakers, bushings and capacitors.

The tester is rugged and reliable and designed with field use in mind. It has a self-explaining guidance menu for easy operation with a bright display and a built-in sensor to monitor temperature.

The set comes with an internal printer that helps the user to take hard copies of the results, along with mean value, standard deviation, and the date and time when the tests are performed.

Portable gas monitor

Subtronics (India) has launched a three-status portable gas monitor (3ST-PT) that can be used to detect a wide range of hazardous gases.

The unit gives an audio-visual indication if the reading goes above a preset level. Its main features include an adjustable alarm by soft touch keys, a bright liquid crystal display, a latching alarm, non-volatile memory, password-protected critical menu settings, print readings with date and time, user-selectable multiple number of prints for quality record documentation, and a charging indicator with a long battery life.

TOOLS & EQUIPMENT

Development kits for wireless networking applications

Merging the performance and ease-of-use of Stellaris ARM Cortex-M3-based microcontrollers with leading wireless connectivity solutions, Texas Instruments Incorporated (TI) has launched three new wireless kits. The kits serve as modular extensions to TI's Stellaris DK-LM3S9B96 development kit to give engineers complete software and reference design solutions for adding RFID, low-power RF and ZigBee capabilities to designs. With this offering, TI is building on its broad portfolio of 16-bit, ultra-low-power MSP430-based

wireless connectivity solutions, now providing 32-bit Stellaris MCU performance for execution of additional advanced connectivity and control functions.

Two-port USB HDMI KVM switch

Aten International has launched a two-port USB HDMI KVM switch (the CS692) that allows users to control two HDMI-enabled computers from one USB keyboard, one USB mouse and one HDMI monitor. Featuring

HDMI functionality, USB 2.0 peripheral sharing, gaming keyboard support and enhanced user-friendly operations, the CS692 allows users to keep up with the latest innovations in desktop multimedia applications. It also offers the latest mouse port switching function that allows users to simply double-click the scroll wheel of a USB mouse to change ports.

The device is fully compliant with HDMI 1.3a digital standards, allowing users to enjoy Blu-ray content at full HD 1080p resolution and Dolby true-HD/DTS HD sound. The switch is priced at Rs 7500.
