## Indian animation market to grow 22 per cent annually

Bolstered by increased outsourcing and a growing domestic market, the Indian animation market is all set to hit \$1 billion by 2012.

"Animation in India is on the right track. There is a lot of interest in it, and therefore a lot of uptake in the sector," quipped Ketan Mehta, founder of Maya Academy of Advanced Cinematics (MAAC).

The Indian animation market, estimated at \$494 million in 2008, is likely to grow at compounded annual growth rate of 22 per cent till 2012.

"Our biggest advantage is the technical expertise, robust telecom infrastructure and English-speaking graphic designers and animators who with relevant training can be quickly made ready for the industry, at costs lower than those prevailing in developed markets," Mehta added. Indian companies have also been helped by the increase in production budgets for animation movies worldwide.

## Fixed-voice revenue decline

According to Gartner, the Indian consumer fixed-services market is on pace to reach Rs 245 billion in 2010—a 56 per cent increase from 2009 revenue of Rs 232 billion. The consumer fixed-services market includes consumer voice-service revenue, consumer broadband-access revenue and consumer Internet-access revenue.

Consumer fixed-voice revenue is forecast at Rs 183 billion in 2010—a two per cent decline from 2009. From 2010 through 2014, voice revenue will further decline by 8 per cent.

"The primary reason for the decline in voice revenue is the decrease in fixed-voice lines. Voice traffic has substantially shifted to mobile connections from fixed connections," said Neha Gupta, senior research analyst at

## ELCINA-EFY Awards winners announced

The winners of ELCINA-EFY Awards for Excellence in Electronics Hardware Manufacturing & Services 2009-10 were recently announced in New Delhi. Ajai Chowdhry (in front, centre), chairman and CEO of HCL Infosystems, was adjudged *Electronics Man of the Year*. Other winners included Jabil Circuit and Epcos (for large-scale exports), Sahasra Electronics and Linkwell Telesystems (for small- and medium-scale exports), Bharat Electronics and HCL Infosystems (for quality and environment management), Su-Kam Power Systems and Deki Electronics (for R&D), Vishay Components and Elcoteq Electronics (for business excellence), and Mukesh Arora and Rajeev Venkat of Teracom and C. Shivakumar Reddy of Kavveri Telecom Products (for entrepreneurial excellence).

The chief guest, R. Chandrasekhar, IAS, secretary of Department of Telecommunication (DoT), Ministry of Communication & IT, government of India, is seen here in the centre of second row

Gartner. "We will continue to see this trend going forward with consumers abandoning their fixed lines even as service providers are increasingly bundling their broadband and lately IPTV to retain their fixed-line customers."

## GPS accelerometers and gyroscopes in smartphones by 2013

ABI Research anticipates that the sensor-driven user interface (UI) will be an emergent theme in mobile phones—turning objects, locations and people into networked, interactive elements. By 2013, 85 per cent of smartphones will ship with GPS, over 50 per cent will ship with accelerometers and almost 50 per cent will have gyroscopes.

Prompted by Apple's UI innovations with the iPhone, smartphone OEMs have poured resources into UI

design and development. Many OEMs, particularly those using Google's Android OS, have developed their own custom UI overlays.

The growth of sensors in smartphones will be driven by such applications as gaming, location awareness and augmented reality, as well as the expansion of motion-based commands.

## Global 3-D TV sales to reach 50 million in five years

The global 3-D TV market will expand in the next couple of years, establishing itself and accumulating a base of content and devices (both TVs and Blu-ray players). In 2013, according to ABI Research, the market growth will start to accelerate, and global shipments of 3-D TV sets will approach 50 million in 2015.

The 3-D TV market is moving faster than expected, notes industry analyst
