Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

capacity of 500,000 GSM and CDMA cell-phones per month. The plant will start production in 2011, Vachani added.

ONGC, NTPC foraying into LED manufacturing

ONGC and NTPC, two of India's largest public-sector companies, are venturing into LED manufacturing. ONGC's Energy Centre is in the process of finalising a joint venture partner for assembly and packaging of LED luminaries in India, whereas NTPC has tied up with Society for Integrated Circuit Technology and Applied Research (based in Bengaluru) for making the LED lamps.

Zicom restructures business

Zicom, an electronic security brand, has restructured its business model post the Zicom Schneider deal. Zicom's new business model is targeted towards moving into high-growth telecom infrastructure security having

recurring service revenue. Zicom will also refresh its focus on the home and SME electronic security markets.

Zicom will set up a subsidiary to venture into the business of providing managed security services to telecom operators/telecom infrastructure providers for their base tower stations (BTS) that are remotely located and other assets. In the first three years of its operations, the company will target 20,000 BTS out of more than 300,000 telecom towers in India.

Micromax enters the Middle-East

Domestic handset maker Micromax Informatics has forayed into the United Arab Emirates (UAE), Sultanate Of Oman, Kuwait and Qatar, through its wholly owned subsidiary Micromax Informatics FZE.

According to the company, "Product innovation has been a key factor in driving Micromax growth in India

and it plans to bring an innovative product lineage to the consumers in the Middle East too. Micromax handsets will be aimed at consumers across all segments with special focus on the youth in the age group of less than 30 years."

The company already enjoys presence in Nepal, Sri Lanka and Bangladesh, and this is the fourth international forum for Micromax.

IPCA to set up PCB testing lab in Bengaluru

With the objective of formulating indigenous standards to test printed circuit boards (PCBs) and improving the quality of PCBs, the Indian Printed Circuit Association (IPCA) is planning to open a PCB laboratory in Bengaluru by June 2011, in collaboration with Japan Printed Circuit Association. This full-fledged test lab will meet the needs of the PCB industry for testing the quality of their products and certifying them based on international standards. The testing of boards will be done using high-end testing equipment, which the association will import.

Vodafone selects Ericsson as 3G product vendor

Cellular service provider Vodafone Essar has selected Ericsson as the exclusive 3G HSPA hardware, software and related service vendor to equip India's largest metropolitan cities—Mumbai, Delhi and Kolkata—with latest HSPA mobile broadband network. Vodafone Essar will deploy the latest HSPA technology to deliver services like video telephony, mobile broadband, mobile TV, video on demand, music downloads, video tones, instant messaging and online gaming.

MIC Electronics acquires Avni

MIC Electronics has acquired 51 per cent stake in Avni Energy Solutions—a Bengaluru-based LED lighting company.

Dr M.V. Ramana Rao, chairman and managing director of MIC, said, "We are pleased about acquiring
