

paddle movement, torque and spin control from the paddle directly to the software. All of this technology is powered by a built-in rechargeable battery.

World's first 3-D image and video capturing camera

Fujifilm has unveiled what it calls the world's first consumer camera to capture video and still images in 3-D. These 3-D images or video can be seen on a large LCD screen without special glasses or on 3-D HD TV systems using the 3-D glasses that come with the television. The captured media is stored in high definition and

Fujifilm W1 3-D camera

could be viewed on an LCD/LED TV via an HDMI mini cable.

The camera also features an 8.9cm (3.5-inch) LCD screen having a resolution of 1150k that displays images in 3-D without the need for special glasses, as well as 3-D and 2-D functions and some other features.

The camera retails for \$599.

Internet TVs using Google platform

Sony has announced for the US market a new range of LCD TVs that come equipped with Google TV. These high-definition TVs allow users to surf the Internet, use applications, stream online content and better organise and search programming.

Sony's Internet TVs are Wi-Fi-ready, built on Google's Android platform and feature Intel's Atom chip. They are priced at \$600 for a 61cm (24-inch) model and range up to \$1400 for a 116.8cm (46-inch) set. Sony is also planning to launch a \$400 set-top box that has the same functionality as these TVs, and also includes a Blu-ray player.

The key feature of Google TV is a search box that accesses Google's search engine to scan live programmes, DVR recordings and the Web, delivering a simple list of results that can be accessed with a push of the button. Moreover, users can toggle between live TV, Web content or apps from familiar names like Pandora, YouTube, Twitter and the NBA. The TV feed can be locked in a corner of the screen, so viewers can surf and watch at the same time.

BINAY - Lighting Up The Future

BINAY LED

Aviation Obstruction Lights for:

- Industrial Chimneys
- Radio, TV and Structural Towers
- High-rise Buildings & Structures
- Airports and Airfields

Available In Low Intensity and Medium Intensity Versions (as per the International Civil Aviation Organization guidelines), BINAY's PATENTED LED Aviation Lights come with a 5-year Warranty.

BENEFITS

- Rt-and-forget maintenance-free operation
- Long life of 100,000 hours (20 years at 12 hours daily burning)
- Shock-proof and vibration-resistant

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT
