

Brush High Performance Alloys for Demanding Applications

Locally Connecting Global Partners

Brush Wellman Inc. is the only fully-integrated producer of copper beryllium in the world. For more than 75 years, we have provided the most reliable, high performance copper alloys for electronic connectors in demanding computer, telecommunications, aerospace, medical and automotive applications. Brush Wellman copper beryllium alloys and copper-nickel-tin alloys guarantee the ultimate performance combinations, which allow connector designers to cost effectively achieve their key performance targets.

Let our India distributor show you how easy and convenient it is to work with Brush Alloy Products. All of our strip and bulk products are now available locally.
