

between Rs 1895 and Rs 7995.

AKAI-branded mobile phones will be sold in India through Global Brands Enterprise Solutions, which has the brand rights for India, Sri Lanka, Bangladesh and Nepal.

Pranay Dhabhai, managing director, AKAI India, said, "We hope to become a prominent player in the Rs 700-billion mobile handset market in the coming years. We are expecting an overall turnover of Rs 4350 million by July 2011 and mobile sales are expected to contribute around 40 per cent of the total revenues with targeted monthly sales of 100,000 handsets from October onwards."

MCC too launches mobile phones

MCC Group, a service-based national sales and distribution company across channels like imaging, electronics, IT and telecom, has forayed into the mobile handset business with the launch of an exciting range of mobile phones in the Indian market.

The flagship model 'Jumbo i9,' packed with Bluetooth, GPRS and WAP, is claimed to have an exceptional standby time of 45 days.

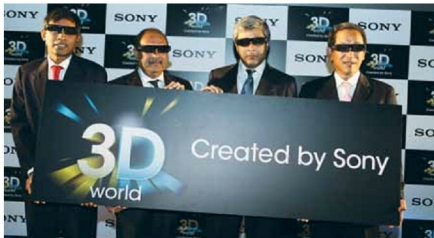

Moser Baer launches USB drives preloaded with movies

Moser Baer India has introduced USB drives preloaded with blockbuster Bollywood movies. This lifestyle enhancing offering will enable consumers to enjoy their favourite content 'anytime, anywhere' on the go. The pre-loaded content can be erased by customers as and when required and the device can be continued to be used as a normal USB drive.

As an introductory offer, these devices are affordably priced at Rs 850 for a 4GB stick.

Sony aims 30 per cent revenue from 3-D

Sony India plans to deliver an array of 3-D home entertainment solutions in 2010. It will leverage all its diverse business assets to create a 3-D world encompassing electronics, games and

3-D content. With the launch of 3-D-enabled hardware products and software content, Sony aims to promote and establish 3-D culture in India and make this technology easily accessible to a wider audience. It is eyeing 30 per cent revenue contribution from 3-D products by 2012.

Masaru Tamagawa, managing director, Sony India, said, "We plan to become the market leader of 3-D on account of providing the most comprehensive range of 3-D products and content solutions. The Indian consumer is willing to experiment and hence we have high hopes from this technology."

Sony is introducing 3-D technology in 4K projector with lens, professional cameras, BRAVIA LCD TVs, Blu-ray disk products, digital still cameras and PlayStation.

ViewSonic to launch tablet

ViewSonic has jumped into the tablet PC fray by launching ViewPad 7 at IFA 2010 – the consumer electronics exhibition held in Berlin recently. ViewPad 7 is a multi-functional, multimedia, Android-enabled device. Consumers can use the device for videoconferencing, social networking and enjoying AV entertainment.

The company is planning to launch this product in the Indian market very soon. "We are expecting to launch ViewPad 7 in India in a very short time and hope we will get a great

response from the Indian consumers who had always been very keen to the most hi-tech inventions," said Gautam Ghosh, country manager, ViewSonic Technologies India.

Samsung launches recycling programme

Samsung has rolled out the Samsung Takeback and Recycle (STAR) programme in India to encourage consumers to recycle Samsung-branded consumer electronics products ranging from televisions, DVD and VHS players, audio equipment and home theatre systems to mobile phones, cameras, camcorders, computer monitors, printers, IT peripherals and home appliances, free of cost.

Consumers can dispose of portable products at 235 locations in 20 cities across the Samsung service centre network. For bigger products, they can avail the product collection facility on a nominal payment basis (if the location is outside the municipal limits) or drop the product at any of the company's 291 collection centres in 21 cities. This initiative will gradually be extended nationally.

HCL Infosystems to consolidate facilities

HCL Infosystems will spend about Rs 2-3 billion over the next three years to consolidate its existing facilities and expand its software business.
