

A.S. Rao: Scientist, Visionary, Humanist

This book tells not just the story of the creation of Electronics Corporation of India Limited (ECIL) at Hyderabad but also how 'little' men made 'big' history entirely on their own, with their never-say-die spirit. Dr A.S. Rao, former chairman and managing director of ECIL and recipient of *The Man of Century in Indian Electronics* award remains the central figure of the narrative.

The book shows how the unassuming Dr Rao became an unparalleled leader, teacher, scientist and entrepreneur, all rolled into one, and inspired hundreds to believe in themselves. It is that belief that led the men and women of ECIL to script success stories in the development of indigenous electronic equipment for atomic energy, defence, railways and telecommunications sector in India, to name a few. Many of these examples of 'India-genisation' are illustrated in this book.
