

(L) Dashboard view and (R) engine start/stop button

button once.

The car won't start if you happen to enter the car without the key fob (even if it's within 0.9 metre of the car). That is, it starts only when the key fob is physically inside the car with you.

If you lock the car and move away with one door open, say, by mistake, its security alarm will alert you by giving a 3-second long warning beep. And the engine won't start with any other Micra key fob.

The antilock braking system prevents the wheels on the car from locking up (or ceasing to rotate) altogether while brake is applied. The electronic brake distribution automatically varies the amount of force applied to each of the car brakes, based on road conditions, speed, loading, etc. The brake assist feature increases the braking pressure in the event of an emergency.

Micra has a powerful AC with

circular vents. Climate control sets the blower speed automatically at any of the seven levels. Powerful throw effortlessly reaches rear-seat occupants. Big buttons are easy to use and the large temperature display is easy to read.

The electrically folding mirrors are electrically adjustable too.

The multi-information display (MID) shows real-time and average fuel efficiency, distance-to-empty reading, clock, fuel level, tripmeter, etc. The meters and MID are easy to read, whether day or night, and always illuminated.

For music lovers, Micra has an integrated audio system that's CD and MP3 compatible and has AUX in but no USB port!

All in all, Nissan Micra is a good buy if you are tech-savvy and craving for attention. It will give many advanced features for Rs 500,000 or so. ●

The authors are from EFY bureau, Delhi

Now You Have An Option to Subscribe to EFY Digital or EFY Print, or **Both!**

You can get digital version of Electronics For You much earlier, wherever you are – except in space or some other planet.

At the same cost as the print version. In an easy to see form, complete with all the illustrations, pictures and advertisements. Just like the print version you are used to at present – if you have a broadband connection.

You also have the option to receive both the versions, i.e., digital and print, if you simply love Electronics For You – like most of the readers do. They like to read their copy and preserve it too for reference from time to time.

Additional cost for both the versions is not double of each; it is just marginally more. For your ready reference, one year's (12 issues') subscription rate (with CD) are:

	Within India	Outside India
Digital EFY	₹ 360	US\$ 10
Print EFY	₹ 540	US\$ 100
Both versions	₹ 725 only	US\$ 105

If you are outside India but can't pay in US dollars, pay the equivalent of US dollars in Indian rupees. No hassles. You can pay for EFY even through your credit card on www.efymag.com
