

Turn Your PC Into Entertainment Centre

With powerful multimedia player software

What's EFY-CD all about?

Welcome friends! Wondering what goodies we have in the EFY CD? Allow us to reveal all! There are three to four different categories of software that we feature every month, most important of which is the 'Design and Simulation' category. It comprises various electronics software, datasheets, e-books, circuit ideas and EFY software. The CD also contains three other sections: Resources, Fun and Utility. 'Resources' contains essential software like Acrobat Reader, Enzip and a few others, which form the basic requirements of any PC. The 'Fun' segment includes computer games, whereas in 'Utilities' you will find multimedia and IDE software, Internet applications, etc.

MediaPortal

MediaPortal software application turns your PC into a very advanced MediaCenter. It allows you to listen to your favourite music and radio, watch and store your videos and DVDs, view, schedule and record live TV as a digital video recorder and much more. You can create your own skins or choose one of the available skins. It is highly extensible as it can be extended with extra plugins. It requires Microsoft .NET Framework, DirectX 9.0c and Windows Media Player 11.

Kantaris

Kantaris is a new media player based on the code from Videolan client (VLC) and Bass audio library. It has a graphical user interface similar to that of Windows Media Player. Version 0.6.6 works with Windows 2000, XP, Vista and Windows 7.

aTunes

aTunes is a powerful, full-featured, cross-platform audio player and manager. Currently supported formats are mp3, ogg, wav, wma, flac, mp4, ape, mpc, mac, radio streaming and podcasts. It also supports large playlists with thousands of songs. A filtering option allows looking for particular artists, albums or genres. As the application is developed in Java programming language, it is capable of running on any computer that runs Java. The supported platforms are Windows, Linux and Unix.

JetAudio

JetAudio is a multimedia software that can play various music and video files. It also has such features as CD burning, recording and conversion into other file formats.

VLC media player

VLC (Initially VideoLAN Client) is a highly portable multimedia player for various audio and video formats, including MPEG-1, MPEG-2, MPEG-4, DivX, MP3 and OGG, as well as for DVDs, VCDs and various streaming protocols.

XBMC Media Center

XBMC Media Center is a free cross-platform media player software and entertainment system. Currently, XBMC can be used to play almost all available popular audio and video formats. It was designed for network playback, so you can stream your multimedia from anywhere in the house or directly from the Internet using practically any protocol available. To know what exactly XBMC is capable of doing, you need to install it and try. Officially, XBMC is available as a native application for Linux, Mac OS X and Microsoft Windows.
