STORAGE

High-performance but affordable flash cards

Transcend has expanded its flash card product line with introduction of the standard Class 4 Series and the new 32GB Ultimate series Class 10 SDHC cards. The Class 4 SDHC cards are aimed at entry-level users, while the Class 10 SDHC cards are designed for the professionals to enjoy high-speed consecutive shooting and smooth HD video recording.

Although the Class 4 cards are less expensive, users can still take extremely high-quality photos with their point-to-shoot camera. Featuring acceptable transfer speeds up to 13 MB/s and large capacities up to 32 GB at an affordable price, these strike balance between performance and cost.

The Class 10 cards offer massive storage capacity and enhanced transfer speeds of up to 20 MB/s. This unique combination of speed and capacity not only helps record clear and smooth 1920x1080p Full HD videos, but also enables high-speed consecutive shooting.

COMMUNICATIONS

Multi-function communications system

Siemens Enterprise Communications (SEN India) has launched Bittel's UNO multi-function communications and entertainment platform that allows hoteliers in all segments of the industry to reduce the number of devices they purchase and deploy in guest rooms. The platform combines a full-featured hotel phone, an alarm clock/radio and an iPod/iPhone/MP3 player audio

interface into a single device.

UNO is available in three variants: Media (with alarm/clock and audio player interface), Voice (guestroom

speakerphone) and Trimline (bathroom phone).

UNO Media serves as a guest room phone with all necessary features and also as an alarm clock/radio. It has a standard line-in audio input and two USB ports.

Embedded IP-PBX server

Matrix Comsec has launched an all-in-one embedded IP-PBX server for small and medium enterprises.

The server named 'SAPEX' integrates a SIP proxy, registrar and presence server in a compact hardware platform. Its users can place voice and video calls over the IP network. Other features include centralised call control and media relay services, auto attendant, voice mail and presence-based services. The built-in radius and SMTP

client in the server allow advanced services to be integrated. SAPEX is available in two models—SDM with support for 200 users and DDM with support for 500 users.
