

distortion-free output voltage, current, frequency and phase shift are adjustable with a high degree of accuracy and stability via RS-232 and an external

program from the PC, or with the help of front-panel keys. The source can generate three phases independent of the input supply voltage. With the help of optional internal error calculator, the system can be used to simultaneously test three energy meters to an accuracy of better than 0.1 per cent.

Energy-efficient power supplies

Delta Group has launched energy-efficient industrial power supplies in DIN rail and panel-mount versions.

Both Delta PMC panel-mounting and CliQ DIN rail power supplies pro-

vide choices of nominal output voltage of 24V and 12V with a wide temperature range. Their state-of-the-art design can withstand harsh industrial environments. The output terminal types and locations ensure fast wiring and easy installation. Both products have enhanced safety features like short-circuit, overload, thermal and over-voltage protection.

Versatile home UPS

Providing sophisticated and inspirational portable source of backup power, tribal Italia from Amara Raja is a versatile and intelligently designed home UPS system. The UPS system uses i-DSP technology to deliver pure sinewave output that protect gad-

gets. It also incorporates a cradle rocker system for easy battery management. The soft-glow LED lighting on top illuminates instantly when power fails.

tribal Italia comes with two 5A sockets and one 6A two-/three-pin socket. It is available in two models—tribal Italia 650 and tribal Italia 800.

TEST & MEASUREMENT

Portable oxygen monitor

Subtronics (India) has introduced a new oxygen monitor (model OXYn) to monitor the presence of oxygen in ambient air.

The OXYn displays the presence of oxygen in digits and activates an alarm if the concentration of oxygen increases or decreases above or below set values. The instrument is battery-operated (rechargeable) and indicates a low-battery indication when it needs charging with built-in battery charger. Its dual design lets the user use it with or without an external probe.

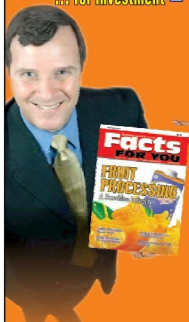

Typical applications include laboratory-air monitoring, personal moni-
