One in every four urban households has a computer

Over the last three years, there has been a quantum jump in PC desirability among urban households in India, with nearly 28 million households owning a computer. One of the greatest contributors of this growth is the youth of India, reveals a study by Intel and IMRB. The study says computer penetration has doubled in the last three years from 19 per cent to 38 per cent across SEC A, B and C in the country. The study surveyed over 19,000 households from across 82 cities and found the jump was across "user profiles, socio-economic segments as well as town classes, which reiterates the universal acceptance and relevance of computers in enhancing today and shaping a better tomorrow."

The penetration of PCs in SEC B and SEC C, though on a smaller base, has increased over 100 per cent. There has been a dramatic increase in PC desirability from 35 per cent to 57 per cent amongst SEC A-C households in urban India with the desirability of SEC C having shown a dramatic increase of over 100 per cent from 26 per cent to 54 per cent. This signals that owning a PC is no more restricted to the upwardly mobile urban users.

BSNL gets new head

Bharat Sanchar Nigam Limited (BSNL) has appointed Gopal Das as chairman and managing director. With an extensive experience spanning 35 years in the field of telecom and his association with BSNL as the director, human resources development, Das is said to be an ideal choice for the post. Prior to joining BSNL, he served as the chief general manager of wireless services at MTNL Mumbai.

Tata Communications adds new global head

Tata Communications has appointed Laurie Bowen as president of sales and strategy for global data and mobility. Responsible for all sales and marketing globally (excluding wholesale voice), Bowen will lead the Global Carrier & Enterprise Solutions teams to devise go-to-market strategies and identify opportunities to enhance the solution portfolio, driving business globally with a focus on

emerging markets.

Fujitsu gets new CEO

Fujitsu Technology Solutions has roped in Rolf Schwirz as its new chief executive officer (CEO). Schwirz joins Fujitsu from SAP, where he is currently head of mature markets EMEA. He will take up this new position at Fujitsu Technology by November 2010 latest. Schwirz will report directly to Richard Christou, corporate senior executive vice president at Fujitsu Limited.

Expanded role for Garde at Dell India

Sameer Garde, who has been the Dell India country head and led Dell's large enterprises business for about last 18 months since the company's reorganisation into a customer-centric business unit structure, will continue to lead as the country manager for Dell India but moves into an expanded role as the Asia Pacific and Japan (APJ) director for services sales and marketing.

The study also reveals that 48 per cent of non-owners who voluntarily use the PC for six to ten hours a week intend to buy a computer in the next six months. While buying a PC, all socio-economic class buyers seek value in the PC and how it can impact their daily life in a positive manner.

Net browsing on 60 per cent mobile handsets in five years

Do you really need a smartphone to check your e-mails on the phone? No

longer. By 2015, more than 60 per cent of mobile handsets worldwide will include mobile browsers, says a new study by ABI Research.

Highly sophisticated browsers to access the Internet will be found in all smartphones and a growing number of enhanced (or feature) phones. "A real key to the growth of full Internet browsers in higher-end feature phones is the falling cost of sophisticated applications processors," says the research.

Mobile data usage grows with 3G adoption

Mobile data usage continues to grow exponentially as 3G technology spreads globally. From 2009 to 2015, data usage in Western Europe and
