

The first meeting was attended by about 50 manufacturers.

Dr M.V. Ramana Rao, chairman and managing director of MIC Electronics, is the president of LEDMA.

Moser Baer's energy business attracts huge investment

Moser Baer Projects Private Limited (MBPPL), a developer of power generation facilities with a diverse pipeline of thermal, solar and hydro-electric power projects, has attracted an investment of Rs 13.5 billion from The Blackstone Group.

MBPPL plans to commission 5000 MW by 2016, comprising 4000 MW of thermal, 500 MW of solar and 500 MW of hydro capacity. Blackstone's investment will enable MBPPL to emerge as a leading player in the Indian energy sector over the next few years.

Nikon on expansion spree

Nikon India is laying impetus on building a strong service delivery network. It has planned to set up over 21 authorised collection centres in 21 cities across 14 states. Added to this, there are 18 well-established, authorised Nikon service centres, to which three more will be added by year-end.

On the retail front, Nikon has already spread its footprint with over 50 D-SLR and COOLPIX zones with a target to take the count to 80 by March 2011. In addition, it has established a branch office in southern India in

Bengaluru. The office expands Nikon India's ability to offer local sales and support services to its fast growing base of customers and prospects in the region.

Registering a robust growth in the India market share in D-SLR and COOLPIX compact camera segments, Nikon aims to touch a market share of 50 per cent (from a current 45 per cent) and 15 per cent (from a current 13 per cent), respectively, in the two segments by 2010-11.

Acer bullish on Indian server market

Taiwan's Acer, the world's No. 3 PC brand, targets around 14 per cent of the Indian server market by the end of this fiscal year. The company had a market share of 7.5 per cent in the first quarter of 2010.

"We have been a strong player in government and education segment in past. But after launching our entire portfolio, we are expecting to gain share from other verticals, notably SMB and enterprise," quoted S. Rajendran, CMO, Acer India.

To achieve this target, Acer would launch a wide range of 17 new models under four different server categories of tower servers, rack servers, density optimised servers and blades.

ASUS bullish on mobile PCs

ASUS Technology is eyeing 20 per cent market share in the Windows mobile smartphone segment in the next two years.

Alex Huang, general manager, system business group, ASUS Technology, said that the company plans to infuse over Rs 50 million in FY 12 "to have dedicated partners for consumer and commercial segments, as characteristics are varied for both segments.

We will also be using the funds for opening new showrooms here and for service ventures."

The company would engage with partners—city-wise and region-wise—to foster their relationship with end-customers.

TÜV Rheinland inaugurates South Asia's largest PV lab in Bengaluru

TÜV Rheinland, a global provider of technical, safety and certification services, is eyeing a larger share of the Indian market for photovoltaic (PV) testing and certification. To this end, the company has set up India's first and South Asia's largest PV laboratory at Electronic city in Bengaluru. Seventh in TÜV Rheinland's global network of solar testing labs spread across Germany, China, Taiwan, Japan and the US, the new state-of-the-art laboratory addresses a key challenge faced by the Indian solar/PV industry—lack of access to a large-scale, world-class test facility.

Friedrich Hecker, CEO, TÜV Rheinland AG, said, "With the ambitious Jawaharlal Nehru National Solar Mission being operationalised, India is poised to take a huge leap in solar/PV. Module manufacturing, a key component of the chain, is largely domestically addressed and offers a great export potential as well. The setting up of the PV lab by us today in Bengaluru not only addresses the lack of such a facility in India but actually enables Indian module manufacturers to eye markets beyond India."

Schneider to set up centre of excellence in Bengaluru

Bengaluru-based M.S. Ramaiah Institute of Technology (MSRIT) with technical inputs from Schneider Electric has deployed two courses, namely, advanced industrial automation and modern controls and energy management. Schneider and MSRIT feel that this will go a long way in developing young engineers who could be productive from day one as they will have

A mobile PC
