

From the House of Ingen Technologies

Weather Sensor

AWS measures rain, humidity, temperature, sunshine, vapor pressure etc on a real time basis. Supports GSM, Zig bee, RS484 communication protocol. Built In modular way, ranges between Rs.5000 to Rs.75000

Mobile based payment system

- Attached thermal printer, RFID tag reader, temperature probe, soil testing equipment
- To be used by Insurance agents, bank correspondents

Verde Card

- Agro-advisory
 - Weather forecast
 - Rural Insurance
 - Inbound expert query
- At Rs.50 per month.
Supported by call center

Programmable set point controller for irrigation systems

- Automatically regulate irrigation as per weather
- Remote Switch on/off

Call: 9810996489 or write to info@theingen.com for further queries.
Open for distribution /franchisee tie UPS

Vehicle Tracking System (VTS)

www.itracksolution.com

iTrack-W9

- SIRF GPS with 20 Channel receiver
- Quad band GSM Module with GPRS
- 32-bit ARM Cortex microcontroller
- 4 MB internal flash for data storage
- Compact size: 120x85 mm
- 8 analog/digital input/output for sensor interfacing
- 1 Relay output for ignition or fuel pump control.
- Configurable on the air by SMS
- Rugged weather proof IP65 box
- Internal GPS and GSM Antenna
- Integrated RFID for Smart Card Access

Online Vehicle Tracking Software

SMS/GPRS Data logging, Use Map data / Google Maps, Web based, Internet/SMS query, Vehicle Operation reports, Admin tools for fleet management.

GSM/GPRS Modems

RS232 interface for direct communication with computer / embedded system.
Modem for AMR with direct connectivity with energy meters (Secure, L&T etc.)
SMA connector for GSM Antenna.
Network LED on Module for indicating module state

On board power supply regulator for external Supply voltage range 9V to 24V
Powerful TCP/IP protocol stack for M2M applications and bidirectional data transfer over GPRS.
ABS / Polycarbonate plastic enclosure for rugged environment
Quad band SIMCOM GSM Engine

GPS Board

GPS Board for clock applications

Remote Monitoring System

- 32-bit MCU based remote monitoring systems for telecom BTS sites
- Distribution Transformer monitoring system
- GPRS based Energy Meter Data acquisition as per R-APDRP specification
- Energy Meters design and Power management unit based on embedded 32-bit MCU.
