

Dispose Batteries Safely

- Don't throw used batteries with the trash or give them to scrap dealers.
- Batteries contain heavy metals that can damage the environment if not disposed properly.
- As per law used batteries must be given to the dealer, manufacturer or an approved recycler.
- All Relicell dealers accept used batteries and give a rebate on purchase of a new one.

Cover More on Solar Energy

Please publish more articles on solar panels and solar-based circuits covering topics like applications of solar energy, solar inverters and charging a battery bank for long duration after sunset. Such articles will make the readers aware of the potential of solar energy and use solar energy more efficiently, thus contributing to a greener world.

Suggestions for EFY-CD

Congrats for doing a very good work in electronics. Over the years, EFY has been one of the frontrunners in bringing useful reports and articles about new technologies for mass audience in India.

EFY readers include professionals who are looking for new device details, vendors, beginners, hobbyists, etc. However, I feel that the EFY-CD content is useful only for hobbyists and newbies.

Also, as businesses are going green, you too can do away with EFY-CD by publishing the CD content online for EFY subscribers (who can access it using their subscriber account and log-in password).

Embedded Projects Book

Is there any good book on embedded projects?

Vinod Chauhan
 Mumbai

EFY: EFY is preparing a 'Micro-controller-based Projects' book. This book can be useful for those who are working on embedded projects.

Memory Card Fundamentals

The 'SD/MMC Memory Card Fundamentals' article published in June issue was really good. I suggest you to publish more articles

on USB, memory cards, PCI and Bluetooth.

Sandeep Kumar
 Nellore

Price of Chip-Talk

I want to learn the basics of PCB making and electronic kit assembly. Can you suggest some courses for the same? Also, tell me the cost of Chip-Talk book published by EFY.

Julnar
 Through e-mail

EFY: You may join the PCB Designing and Basics of Electronics courses conducted at EFY Tech Centres. The Chip-Talk book is priced at Rs 80 (handling and forwarding charges extra).

Thanks!

I have been reading EFY since last year. Thank you for keeping me updated on the technology front. I like every article published in EFY. Project articles, in particular, are very useful and informative.

Circuit Repetition

In 'Circuit Ideas' section, circuits of alarms and water-level controllers are covered frequently. Please publish new circuits.

Yashodhan Vaidya
 Through e-mail

EFY: We make sure that no circuit is repeated. Many circuits may have similar titles, but the circuit designs are different.

Voltage Stabiliser

In the 'Voltage Stabiliser Using PIC16F887A' project published in August issue, on page 66, in the eighth line of the first column, read 'half-wave' as 'full-wave.'
