

FUJIFILM FinePix Jx200

Price
₹ 7799
Features

- Resolution: 12 MP
- Optical zoom: 5x
- LCD: 6.9 cm (2.7 inches)
- HD video recording: Yes

the camcorder. The zoom mic function will ensure that you don't miss even a slight sigh from your subjects.

Optical image stabilisation. This is the most important factor while purchasing a camcorder with a high optical zoom, as it helps you capture blur-free, shake-free videos and pictures.

LCD screen size. Menu settings on the screen should be clearly readable. Also, the screen should not be very large as it will make the camcorder bulky and cumbersome to use.

New features

Features like face detection, multiface detection and anti-blur are common today. You can look out for new features like the ones given below.

Internet-friendly share button. All Kodak cameras now come with an Internet-friendly Share button that makes it simple to e-mail and upload pictures to Kodak Gallery, Facebook and FLICKR, or post videos to YouTube. Simply press the Share button, choose your sharing destination and connect the camera to your computer to send the pictures automatically.

EXMOR R CMOS. This technology in the new camcorder and digital camera range by Sony allows you to enjoy richer colours, high-speed processing and lower power consumption. EXMOR R performs stunningly well in low-light performance and increases sensitivity by 2x to reduce noise. It also reduces noise by achieving high-speed signal processing.

Sweep Panorama technology. The W, T and H series of Sony Cyber-shot cameras have the Sweep Panorama technology. With this technology, the

camera automatically assembles individual frames shot at a high speed with automatic position adjustment to create one stunning panoramic image in as fast as three seconds.

Dynamic Photo. This function in Casio cameras creates moving photos by cutting moving subjects from one background and combining those images on a different still image. In addition to composites made with a still image background, cut-out moving images can now be pasted on other moving images as well. This capability raises the power of expression of images.

Premium Auto. It enables the camera to automatically analyse the scene being photographed—including distinguishing night scenes, backlighting, a blue sky, green trees or a sunset—as well as sense whether there is a face in the frame, the movement and position of the subject, and whether a tripod is being used. It simultaneously optimises settings for exposure, ISO sensitivity, point of focus, photo blur correction, tonal range and colour balance, and level of noise reduction.

To sum up

Go for a digital camera or camcorder depending on the kind of images and videos that you will be taking most often. And if you choose to buy a digital camera, don't ignore the advice of Kenichi Tanaka, managing director, FUJIFILM India: "High megapixel is not the only deciding factor in a digital camera, CCD size, image processing circuits and high-precision optical lens system too contribute to better image quality." ●

BOOKS

NEW RELEASE
Power Electronics & Its Applications

 Second Edition
 Alok Jain
 Price: Rs. 240/-

Power Electronics: Devices Circuits MATLAB Simulations

 Alok Jain
 Price: Rs. 315/-

Fundamentals of Microcontrollers and Applications in Embedded Systems

 Ramesh Gankar
 Price: Rs. 300/-

30% Discount
Parallel Port Complete

 Jan Axelsson
 Price: Rs. 330/-

45% Discount on following two books till stock lasts
USB Complete

 Third Edition
 Jan Axelsson
 Price: Rs. 385/-

Serial Port Complete

 Jan Axelsson
 Price: Rs. 330/-

Programmable Logic Controllers & Industrial Automation: An Introduction

 Madhuchandra Mitra
 Samarjit Sen Gupta
 Price: Rs. 200/-

Embedded Ethernet & Internet Complete

 Jan Axelsson
