LIGHTING

LED tubelight

Binay high-efficiency low-wattage Quadra ES PowerLED tubelight is designed as a retrofit replacement for the standard 36W fluorescent tube. It provides performance at 33 per cent lower power consumption than other

LED tubes. It achieves this at a power consumption of 12W, using very high-efficiency LEDs. This achieves considerable power savings. Light output performance is equivalent to that of the T-8 (1200mm) fluorescent tube.

Solar streetlight

The aluminium-steel housing has lithium batteries, solar panels, circuits, LEDs with PIR sensors for a compact design. It provides uniform light distribution, which is soothing to eyes.

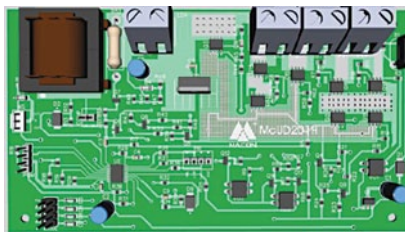

These streetlights can be mounted on a pole in just 15 minutes. Batteries run for 24 hours to 30 hours once charged. These can be used at streets, gardens, parks, roadways, pathways, parking lots and so on.

Solar-LED streetlight controller

McUD171M is an automatic dusk-to-dawn controller designed with the

latest microcontroller based technology for providing a highly-accurate, easy and economical solution to OEMs making solar LED streetlights. It can

drive any load from 24W to 40W with simple links provided. For different types of solar street lights requirement like 24W, 30W, 36W or 40W, the same controller can be used by simple links provided on board.

MISCELLANEOUS

System on module

Apalis TK1 is ideal for building high-end embedded products, which need advanced performance or supreme graphics, along with high-speed connectivity interfaces, mostly targeting applications in vision and GPU-accelerated parallel processing. It is pin-compatible with existing Apalis systems on modules based on NVIDIA Tegra 3 and NXP i.MX 6 quad/dual processors.

IP phone

Matrix presents SPARSH VP510E, an enterprise-grade IP phone offering intelligent context sensitive keys, which changes according to usage functionalities. Key features are:

1. 240x64 pixels graphical LCD with backlight
2. Four context-sensitive hard keys
3. Fixed function keys (with LED), namely, Voice Mail, Mute, Do Not Disturb, Headset and Speaker
4. Fixed function keys (without LED), namely, Hold, Conference,

Redial and Transfer

5. Built-in 16 DSS keys for feature, line and extension
6. Message waiting and ringer lamp
7. Headset interface: 3.5mm, RJ9
8. PC and LAN Ethernet ports
9. Power over Ethernet (IEEE 802.3af)

Power supplies

RECOM extends its portfolio of medical-certified power supplies with two new series: RACM40 and RACM65. Offering 40W and 65W of power respectively, these compact

and highly-efficient power supplies are available either as open-frame or in semi-enclosed cases. All modules of RACM family are equipped with two independent protective measures for maximum patient protection, which is a must for safety in medical technology.

Terra battery

Some unique features of this product are:

Superior grid structure. High-pressure die-cast spine and grid reinforces corrosion resistance

Reinforced tubular-type separators. Specially-designed tubular pouch achieves highest efficiency and strong resistance to short-circuits

Highest lead amount. 20 per cent extra pure lead amount compared to industry standard
