MP-CL1 mobile projector from Sony

Turns any surface into an HD theatre

This new projector from Sony has a no-lens structure, which makes it compact and lightweight. You can project your favourite movies, TV shows, games and home movies wirelessly, or via HDMI or MHL. The projector features 1920 × 720 HD (aspect ratio of 16:9) quality and auto-focus environment, anywhere you go. Simply choose the image size to suit the situation, with a flexible screen size ranging from short throw for a 101.6cm (40-inch) image, up to a 305cm (120-inch) screen image when pulled back. Either way, you can count on a bigger image at a shorter distance.

MP-CL1 features laser technology that focuses a tight beam of light for every pixel of the image to maintain a sharp image from up close or far away. The sharp image remains in focus even on curved walls and other challenging environments.

Smartphone from Intex

Smartphone with a twist

The new smartphone from Intex allows you to switch between apps without a hassle. Multi-tasking has been made easier with 1.3GHz quad-core processor combined with 1GB RAM, 8GB ROM (includes memory used for the operating system and apps) and Android Lollipop 5.1 with 3G to surf faster.

The 5MP twist camera changes the conventional way you capture memories with just a twist—roll on to take perfect selfies. The smartphone has a 12.7cm (5-inch) display with a resolution of

480x854, 2200mAh lithium-ion battery with a standby time of 275 hours, GPS, Bluetooth 2.0 and many other features. It comes in black and white colours.

Air purifier from Crusaders

For pure air and healthy living

This air purification system is based on the principal of photo-catalytic oxidation using UV, along with 0.3 micron, high-grade, high-efficiency particulate air and carbon filters to neutralise dust, pollen, allergen, smoke, odour, bacteria, virus, other micro-organisms and toxic gases such as formaldehyde. It features a washable EPS elementary filter, photo-catalyst filter, UV lamp and negative ions, among others.

GizMo ByTes

Wizikey launches Android app

Wizikey, a news tracking and analysis website, released its Android app on Google Play Store. With the new app, you can track relevant news in less than five seconds, compare and analyse with competition in less than 30 seconds on a curated database of more than 150 news publications. It will also help you get a quick trend analysis on your brand keywords and news coverage alerts in real-time.

Swachh Paryatan app to keep heritage sites clean

The government of India has launched a mobile app that will enable travellers to send pictures of dirty spots at tourist places to the authorities for immediate action as part of Clean India Mission. The app has been made available for 25 heritage monuments including Taj Mahal, Fatehpur Sikri, Humayun's Tomb, Qutab Minar and Red Fort.

App to avail short-term loans

To avail a short-term personal loan, you need to log on to EarlySalary app through your social media account of, say, Facebook or LinkedIn, answer a few questions about yourself and upload your PAN number and bank statements. Within ten minutes, the credit would be underwritten digitally. With these details, the company would be able to access your credit history, which would help it determine whether to lend or not and fix your credit limit.

Fabric mobile app for developers on the go

Twitter's Fabric mobile app makes life easy for app developers, as they no longer need to rely on desktops and laptops for updates and health of their apps. The app uses push notifications if something is critically affecting one's app without sending tedious emails about the issues. It helps keep all critical data in a single, intuitive dashboard. Users can adjust the frequency of notifications and even select a mute button if they choose to, and can read and write comments on issues from within the mobile app.
