Refining, Reshaping & Realigning Power Architecture

Poor quality of power causes not only physical damage to equipment's but also result in downtime(which, in turn, lower productivity) and a substantial increase in energy cost. So, whether you want to measure power factor or investigate disturbance, observe electric trends or enhance productivity, RISHAB's Power Quality Monitor (PQM) is a must have.

RISH PQM is flexible and compact monitor to measure as well as compute the quality of power.
