Infineon to acquire Wolfspeed

Infineon is set to acquire Wolfspeed Power and RF division (Wolfspeed) of Cree for US\$ 850 million. The acquisition will enable Infineon to provide the broadest offering in compound semiconductors and will further strengthen its position as a leading supplier of power and RF power solutions in high-growth markets such as electro-mobility, renewables and next-generation mobile infrastructure relevant for the IoT.

Samsung aims to keep market leader position

Samsung, currently with a 31 per cent share of the TV market in 2015, is eyeing 35 per cent market share this year. The company has launched 44 new models of smart TVs in India priced up to ₹ 2.4 million, in one of its single largest launches as it looks to consolidate market share in the category.

LEDs reduce power bills at three railway stations

By using LED bulbs, electricity consumption has reduced at three railway stations. Railway authorities have said that they have installed LEDs at Pune, Talegaon and Shivajinagar stations, which has helped in reducing the daily

consumption by 100kW, leading to savings worth ₹ 15,000 a day.

Honeywell installs surveillance, emergency response technology in Ujjain

Honeywell has completed citywide installation of a surveillance and emergency response system in Ujjain to support the Madhya Pradesh Police Department's work in crime prevention, as well as in traffic and crowd management in the recently concluded *Simhashtha Kumbh*.

Oppo to set up factory in Greater Noida

According to *South China Morning Post*, Chinese smartphone maker Oppo Electronics has plans to invest US\$ 14.82 million to set up a new factory in Greater Noida, marking the latest major investment by a supplier from mainland China in India.

Asia-Pacific region to emerge as key contributor to Li-Fi

According to a 6Wresearch report, the global Li-Fi (light fidelity) market is projected to grow at a CAGR of 115 per cent during 2016-22, backed by the need for faster data transfer, growing LED lighting market, rising number of connected devices and increasing Internet penetration coupled with RF bandwidth spectrum crunch.

behalf of every domestic consumer for the purchase of the first ten bulbs.

LED bulbs under UJALA are said to be of superior quality with a total failure rate of 0.31 per cent. EESL provides free-of-cost replacement in case of any technical faults for a period of three years. LED bulbs provided under this scheme have a life of over 25,000 hours.

Fifty per cent of households in Dakshina Kannada use LEDs

Dakshina Kannada's adoption of LED bulbs seems to be a success story. In only four months since the initiative was launched in the first week of February 2016, 50 per cent of the district's households have embraced LEDs.

In terms of the sale of LED bulbs, Mangaluru is third, behind Bengaluru with 4.8 million and Mysuru with 2.5 million. So far, more than 10.3 million LED bulbs have replaced incandescent light bulbs in the state.

What is more attractive is the EMI scheme run by the state, which gives the customer the chance of getting an LED bulb by paying only ₹ 10 upfront with the rest getting deducted from electricity bills every month. LED bulbs in the state are sold at the subsidised rate of ₹ 100.

Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Name, Date and Venue	Topics	Contact address for details
India Electronics Week March 2-4, 2017 Bangalore International Exhibition Centre, Bengaluru	An exhibition for the global electronics industry showcasing concurrently seven events: Electronics For You Expo, DIY Expo, Electronics Rocks, T&M India, LED Asia, Raksha India and IoT Show	EFY Enterprises Pvt Ltd Phone: +91-11-40596605 Website: www.indiaelectronicsweek.com
ExpoElectronica April 25-17, 2017 Crocus Expo, Moscow, Russia	International exhibition of electronic components, modules and components	ExpoElectronica Website: www.expoelectronica.ru

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

bulbs under the Centre's UJALA scheme. This scheme was launched in Gujarat on May 26, 2016, and the milestone of distributing three million LED bulbs has been achieved within a short span of only 19 days.

The scheme is being implemented by Energy Efficiency Services Ltd (EESL), a joint venture formed

between the leading PSUs, under Ministry of Power.

Under this scheme, EESL aims to distribute 120 million 9W LED bulbs in Gujarat and is presently distributing an average of 150,000 LED bulbs daily, across the state.

The Gujarat government is contributing ₹ 10 per LED bulb on

IoT tested from Hitachi, Mitsubishi Electric, Intel gets approval

Hitachi, along with Mitsubishi Electric and Intel K.K. (Japan), has received approval for Factory Automation Platform as a Service (FA PaaS) tested in the field of next-generation factories at Industrial Internet Consortium (IIC).

This tested tests open IoT platforms that seamlessly integrate factory automation in the frontlines of manufacturing and IT that support management and operation. The trio will incorporate the results of these tests into the Internet of Things (IoT) platform Lumada, and create new solutions along with customers and partners.
