UART-Wi-Fi module

HLK-M35 is a low-cost embedded UART-WIFI module (serial port - wireless) developed by Shenzhen Hi-Link Electronic Co. Ltd. It is an embedded module based on the universal serial interface network standard, built-in TCP/IP protocol stack, enabling user serial port, wireless network (Wi-Fi) interface between the on versions. Through HLK-M35 module, traditional serial devices do not need to change any configuration and user data can be transmitted through the Internet.

OLED

Pitek's character OLEDs 8x2, 16x2, 16x4, 20x2 and 20x4 directly replaces corresponding LCD modules. Graphic OLEDs 96x16, 128x64, 128x128,

256x64 and colour OLEDs 128x128, 320x320, 400x400 are also available. Some features are:

- High brightness and contrast

- Ultra-wide viewing angle
- Low power
- Solid state technology
- Rapid response time

LED tubelight

Syska India has announced 22W T5 tubelights with a longer life span of 50,000 hours. T5 lights help save up

to 85 per cent energy compared to conventional ones. With a lifespan of 50,000 hours compared to 1000 hours, these are highly energy efficient, long lasting and environmentally friendly as these have zero mercury and no UV radiation.

3D printer

Massivit 1800 system is the fastest large-format 3D printer that can print objects up to 1.8m (6-feet) high and grow these up to 35cm (1-foot) per hour. The system is equipped with dual process option, which allows for easy printing of two different objects in parallel. It also offers economical 3D printing as its special software features, and its support-less printing results in fairly low material consumption.

Sound transmitter

Pyrotech's electronic ear (sound transmitter) system is a sound system used for measuring the sound generated in a grinding process. The system consists of three units, namely, sound sensor, transmitter and mounting stand. Sound sensor uses the mill shell as membrane and detects mill-shell vibrations caused by the grinding balls, hitting the mill lining and the material in the mill. The system is insensitive to foreign acoustic noise from other surroundings.

mmWave SDR

NI has announced the world's first software defined radio (SDR) for the millimeter wave (mmWave) spectrum. The new mmWave transceiver system is a full transceiver that can transmit and/or receive wide-bandwidth signals at an unprecedented 2GHz real-time bandwidth, covering the spectrum in E-band, 71GHz-76GHz.

Power supply

KUSAM-MECO has introduced a new series of DC-regulated power supplies. These feature high stability, digital display and low ripple. The supplies are available with output voltage variable from 0V - 30V in different capacities, namely, 2A, 3A, 5A and 10A, and also single-channel and dual-channel outputs.

The power supplies have a fixed output 5V@1A for single-channel supplies and 5V@2A for dual-channel supplies. All supplies are overload and short-circuit protected. Auxiliary power required is AC 220V $\pm$ 10% 50Hz.
