

Yokogawa Make DL850E / DL850EV ScopeCorder

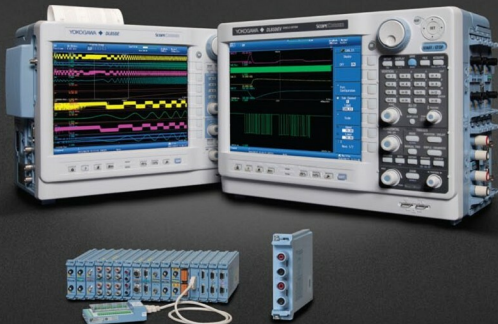

Introducing Our Ultra-Fast Memory Recorder

- High-speed (up to 100 MS/s), High Resolution (up to 16-bit), Isolated (up to 1kV)
- Multi-channel, up to 128 voltage or 128 logic bits
- Continuous hard disk recording at 100 kS/s simultaneously on 16 channels
- CAN bus monitoring and trend waveform display (DL850V only)
- 17 plug-in modules

With 15 unique plug-in module types, the DL850 can handle nearly any measurement task.

The DL850 is backwards-compatible with all modules of its predecessor, the DL750. In addition, four new modules have been added to the lineup.

Combine modules at will to measure anything from minute voltages to high-speed, high withstand voltages.

- High-speed Voltage - **NEW**
- High-precision voltage
- Temperature
- Acceleration
- Logic input - **NEW**

- High Voltage
- Multichannel Voltage/temperature - **NEW**
- Strain
- Frequency
- CAN Monitoring (with the DL850V) - **NEW**
