

COMPLETE

PIC / dsPIC / PIC32 / AVR / STM32 /
Kinetis / Tiva C / 8051 / FT90x
DEVELOPMENT SOLUTION

Choose the compiler in programming language you love the most **mikroC™**, **mikroBasic™** or **mikroPascal™**. With over 500 library functions, lots of examples, a great help file, you will get the job done quickly.

mikroProg™ is a fast USB 2.0 programmer with mikroCD hardware In-Circuit Debugger. It supports PIC / dsPIC / PIC32 / AVR / STM32 / Kinetis / Tiva C / 8051 / FT90x devices

mikromedia and **HMI** is a real swiss army knife for multimedia developers. It is packed with lots of multimedia peripherals.

IOT Development board with over 200 mikroBUS and IDC10 compatible. Click additional Boards are here to meet your development ideas.

Easily create GLCD or TFT user interfaces using **Visual TFT™** and **Visual GLCD™ Software**. Just focus on design and code will be created for you automatically.

EasyMx PRO™ V7 is the best place for 3.3V and 5V high-pin count STM32, Tiva C devices. It features on-board ICD, Two mikroBUS™ sockets, and lots of modules.

EasyPIC™ V7 is the seventh generation of our famous PIC development board. With 3.3V and 5V dual power supply it supports over 250 PIC microcontrollers, and features on-board ID, two mikroBUS™ sockets, and lots of modules.
