## REPAIR AND TROUBLESHOOTING TIPS

Here are a few websites that would help you troubleshoot and fix different devices

Compiled by **NIRAJ SAHAY**

### ifixit.com

iFixit is a Wiki based site that teaches you how to fix almost anything. You can create a repair manual for a device, and/or edit the existing set of manuals to improve these. The site empowers you to share your technical knowledge with the rest of the world. It has approximately 23,000 manuals and 89,000 solutions. It also has an app that can be installed on most mobile devices.

### FixYa.com

The site has over 19 million products' details; it is easy to find information about fixing needs. FixYa continues to empower you to repair and improve your already-purchased possessions. From fixing cars to cameras and iPhones, FixYans are part of a DIY revolution that helps empower techies, tinkers and hobbyists across the globe. It empowers over 30 million monthly visitors to repair and improve their products.

### electronicrepairguide.com

Started in November 2006 by a Malaysian repair technician, this website is a useful resource that helps shorten the fairly-steep learning curve for those who are new to the repairs field. It uses a computer monitor as the guide to show how you can troubleshoot electronic problems easily. It also sends out free newsletters that allow you to stay up to date with all the latest electronics repair news, and learn electronic troubleshooting techniques and a lot more.

### computerhope.com

[www.computerhope.com](http://www.computerhope.com)

Computer Hope provides free support and online services that allow you to learn more about computers and find technical assistance to fix these. It was founded on November 1, 1998, in Salt Lake City, Utah, USA, by Nathan Emberton to help technical support engineers. Though the site is not actively updated, it is still very useful for troubleshooting old computer and operating systems.
