

Indian IoT market set to grow to US\$ 15 billion by 2020

With focus on the rise and evolution of the Internet of Things (IoT) across industries in India, National Association of Software and Services Companies (NASSCOM) held the eighth edition of the NASSCOM Design and Engineering Summit at

Bengaluru in October.

Kevin Ashton, tech pioneer and the person who coined the term 'the Internet of Things,' mentioned that, the IoT has started being incorporated into both consumer and industrial applications. It is being utilised in criti-

cal verticals like healthcare, automotive and manufacturing. The ecosystem is rapidly expanding, owing to demand for industrial and consumer IoT applications, and is set to be a critical part of the next level of growth for the information technology industry.

IESA, TiE and TSSC sign MoU

India Electronics and Semiconductor Association (IESA), The Indus Entrepreneurs (TiE), Bengaluru, and Telecom Sector Skill Council (TSSC) have signed a memorandum of understanding (MoU) for opening a centre of excellence in Bengaluru during IoTNext 2016. The second edition of the flagship event, IoTNext 2016, saw a huge turnout from industry thought leaders, startups and stakeholders in the IoT sector.

With this collaboration between TSSC, IESA and TiE, the centre will help in providing a platform to skill, develop and train blue-collared workers in the field of the IoT. It will empower the group to focus on gaining competency using some of the best practices and help in creating job opportunities for them as the industry shifts towards automation.

NI partners with IBM and SparkCognition to advance the Industrial IoT

NI, the provider of platform based systems that enable engineers and scientists to solve the world's greatest engineering challenges, has announced that SparkCognition is

On The Move

HCL appoints Vijaykumar as president, CEO

IT services major HCL Technologies has elevated C. Vijayakumar as president and chief executive officer of the company. Prior to this, Vijay was chief operating officer of the company. He is also on the board of directors of HCL America Inc.

Ratan Tata replaces Cyrus Mistry as chairman of Tata Sons

Tata Group, one of India's largest conglomerates, abruptly removed its chairman, replacing him temporarily with his predecessor, Ratan Tata, a member of the company's founding family. Tata Group spans dozens of businesses, from salt to software, with collective revenue of more than US\$ 100 billion. Ratan Tata will serve as interim chairman for four months while a selection committee chooses a successor. Mistry was also removed as chairman of Tata Consultancy Services, India's largest software services firm.

Sunil Mittal is new chairman of GSMA

Bharti Enterprises chief Sunil Mittal has been elected chairman of global telecom body GSMA for a two-year term, starting January. Mittal will oversee the strategic direction of GSMA, which represents nearly 800 of the world's mobile operators as well as more than 300 companies in the broader mobile ecosystem.

Vani Venkatesh joins Airtel as CEO - retail

Bharti Airtel has announced the appointment of Vani Venkatesh as chief executive officer - retail. Venkatesh will be responsible for driving Airtel's retail strategy to deliver a seamless customer experience across retail touch point. She takes over from Rohit Malhotra, who after spending over nine years with the company in various senior positions, has decided to pursue opportunities outside of Airtel.

Twitter's India head Rishi Jaitly quits

Twitter India head Rishi Jaitly has quit after four years at the company. Jaitly announced his exit on Twitter through a series of tweets. He said that he has quit for a personal/civic calling in Chicago, but would spend significant time in India/Asia, and continue to work in the field of technology.

OMEGA appoints Joe Vorih as president

OMEGA has appointed Joe Vorih as president of OMEGA Engineering Inc., a pioneer in design, manufacture and distribution of process measurement and control products. Vorih's priority will be to transform OMEGA from the direct provider of process sensors into a Web based global partner for complete process measurement and control solutions, including innovative wireless and IIoT-ready offerings.
