LatestOne.com launches Bluetooth game pad

Gaming made easy

Andro is a wireless Bluetooth controller designed for cross-platform use on Android smartphones and tablets. The new gaming controller brings together a compact and lightweight design with one of the best cross-platform capabilities. Add in a classic, familiar layout and a rechargeable 300mAh battery, and you have the freedom to play.

It supports hundreds of games, including Android platform games and classic arcade game emulators like GBA PSP and the like. Its smart power-saving sleep mode is designed to effectively enhance the efficiency of the battery, providing longer playtime. The game pad is available in black with red colours.

Laptop from ACER World's thinnest laptop

Swift 7 measures only 9.98mm (0.39-inch) in height and weighs a mere 1.1kg (2.48-pound), and provides incredible portability and up to nine hours of battery life. Its top-of-the-line performance is delivered through a 7th Generation Intel Core i5 processor, 256GB SSD and up to 8GB of memory. The latest wireless technology (2x2 802.11ac with MU-MIMO) delivers reliable and up to three times faster connections, while dual USB 3.1 type-C port ensures lightning quick data transfer.

The machine does not skip on delivering premium audio either, equipped with Dolby Audio Premium and Acer TrueHarmony working together to immerse you in clear and bold virtual surround sound. Ergonomically-designed large precision trackpad ensures an easy and comfortable navigation around the screen. A high-definition webcam with high-dynamic-range imaging support provides clear, bright and detailed images.

Milagrow introduces smart healthcare floor vacuuming robot

With Wi-Fi and Health
Ion generator

Milagrow AguaBot 5.0 is India's first full wet mopping and dry cleaning, floor vacuuming robot with the world's largest smartmop of 350mm x 210mm. It comes with a water reservoir and smartmop attachment. Simply fill water in the reservoir, put the smartmop at the bottom of the water tank, attach the water reservoir to AguaBot 5.0 and let the robot do the rest.

The water tank and smartmop have been made in such a way that only the front portion of the mop will do the wet mopping while the back portion, which is not wet, would wipe the floor dry. AguaBot 5.0 generates its own network, which can support up to three mobile devices simultaneously from a distance of up to 150 metres. A total of 12 functions can be controlled with a touch on the mobile device.

UMANG, the master app for government services

A master app to unlock government services for citizens on a mobile phone is slated for launch soon, but only a small number of amenities will form part of the initial rollout. Aadhaar, the unique identity number, will be in the first lot, providing a validation layer for all services, and so are government solutions for healthcare and skill development and those aimed at farmers and students. UMANG will enable citizens to download a single mobile app instead of multiple apps for each department, and make it easy for them to discover government services.

Google launches photo- scanning app

Tech giant Google has rolled out Google PhotoScan that allows you to scan and digitise physical photographs. It detects edges, straightens the image, rotates it to the correct orientation and removes glare. Scanned photos can be saved in one tap to Google Photos, to be organised, searchable, shared and safely backed up in high quality.

Reos Message app

This is an SMS-replacement app for users who want more control over messaging.

The main interface has three tabs—Main, Notification and Promo. The app automatically sorts all incoming and existing messages in your smartphone into these categories. This makes it easier to find a particular message. You can also manually move messages from one category to the other.

Advance Remote Control app from Pioneer

Pioneer's new Advanced Remote Control app converts your iPhone or Android smartphone into a powerful touchscreen remote control, which allows you to manage and customise the features of your compatible Pioneer car stereo system. It lets you maximise the potential of your head unit by browsing your favourite music, switch sources, launch Spotify or other third-party apps, customise illumination colours or control audio settings of the head unit.
