R-IN32M3 : RUN The R-IN! Multi-protocol Industrial Ethernet Controllers For Industrial Automation

The R-IN Engine is an integrated processor subsystem that includes hardware Ethernet and RTOS accelerators, developed for high speed and real-time communication under very low power consumption.

R-IN32M3 is an Industrial Network Controller with multiprotocol support like such as EtherCAT, PROFINET, PROFIBUS, EtherNet/IP and CC-Link IE for industrial applications like Remote I/Os, Sensors, Actuators, PLCs, Drives, Motion Controllers and Robots.

R-IN Solution Kit

The R-IN solution kit is an all-in-the-box package for fast evaluation and rapid prototyping of multiple industrial Ethernet protocols. It features a small R-IN32M3-EC board for evaluation of the industrial Ethernet interfaces, an evaluation version of IARs embedded workbench for ARM®, an I-jet Lite ARM® Cortex®-M3 JTAG debugger, as well as sample software including evaluation versions of several industrial Ethernet protocols like EtherCAT, PROFINET, EtherNet/IP and Modbus TCP.

Benefits of the real-time OS Accelerator

- Speedy interrupt response times

- Fastest task switching

Benefits of The Ethernet Accelerator

- Drastic reduction of overhead processing

TC/IP Communication
