

Government clears investment proposals worth ₹ 173 billion in electronics sector

The government of India has given a nod to proposals worth ₹ 173 billion in the electronics manufacturing sector. Ajay Kumar, additional secretary in the government's Department of Electronics and IT (DeitY), has said, "Out of 195 proposals, entailing an investment worth ₹ 1.21 trillion, we have approved 74 applications amounting to ₹ 173 billion."

The Centre, through its Make in India initiative, aims to fuel domestic manufacturing of electronics products in order to cut imports to zero by 2020. It is currently in talks

with various companies that are eager to establish production units in the country. Chinese companies alone are expected to invest around US\$ 3 billion in the Indian mobile manufacturing sector over the next two years, according to Indian Cellular Association.

National Policy on Electronics aims to attract US\$ 100 billion worth of investment and generate employment for nearly 28 million individuals. It entails setting up of at least 200 electronic manufacturing clusters by 2020.

Smartsensor market estimated to be worth US\$ 57.77 billion

The smartsensor market in India, which is currently worth US\$18.5 billion, is expected to grow at a CAGR of 18 per cent and touch US\$ 57.77 billion by 2022. This has been stated in a report published by MarketsandMarkets. According to the report, major drivers for this market include growing concerns

related to security and surveillance, increased need for energy-efficient devices and favourable government initiatives. The fast-growing consumer electronics sector, global surge in the automotive industry and the growing trend of miniaturisation in sensors are other major factors.

LED lighting market in India to grow at 30 per cent

According to a report released by TechSci Research, the LED lighting market in the country is expected to grow at 30 per cent till the year 2021. This growth will ride on the rising personal disposable incomes, growing government initiatives encouraging the use of LED lights and increasing focus on smartcity projects.

The report says that Delhi-Mumbai Industrial Corridor Development Corp. has announced plans to develop seven smartcities in Gujarat,

Haryana, Maharashtra, Rajasthan, Uttar Pradesh and Madhya Pradesh. These are expected to further increase government focus on energy-efficient lighting products such as LEDs.

Favourable government initiatives and policies such as state-specific and national-level programmes that offer LED lighting products at subsidised rates are contributing in a huge way to boosting LED adoption across the country.
