India to produce lithium-ion batteries

In order to meet defence requirements and to cut dependence on imports, especially from China, India is all set to produce its first lithium-ion battery. Central Electrochemical Research Institute, Karaikudi in Tamil Nadu, has set up the first indigenous lithium-ion fabrication facility that has applications in defence, solar-powered devices, railways and other high-end usages.

Lenovo to invest US\$ 500 million in tech startup fund

Lenovo Group has announced its plans to invest US\$ 500 million in a technology startup fund called Lenovo Capital. It will be funded and managed by Lenovo Group, which is looking to invest in verticals such as Cloud computing, artificial intelligence and robotics.

country. Ministry of New and Renewable Energy has set up a committee headed by Amitabh Kant, chief executive officer of NITI Aayog, and has suggested that the government should now give more subsidies to encourage solar manufacturers.

Piyush Goyal, minister of state (independent charge) for power, coal and new and renewable energy, has said that subsidy support will be given on the basis of a reverse bidding process. Those interested in setting up integrated solar plants (which manufacture solar cells, solar photovoltaic modules, ingots and wafers) can bid for the least amount of subsidy required to be competitive in the market.

Tata Power bags 100MW solar projects

Tata Power's subsidiary, Tata Power Renewable Energy, has won two solar-grid-connected photovoltaic projects of 50MW each in Pavagada Solar Park in Tumkur district of Karnataka.

Tata Power Renewable will sign

The company has plans to set up three manufacturing units in Noida, Andhra Pradesh and Maharashtra. The company plans to manufacture feature and smartphones in the country and by the end of this year, it aims to bring two more brands to India.

Microsoft to end smartphone manufacturing

Microsoft has announced that it will lay off 1850 employees, and a union from Finland called it the end of smartphone manufacturing for Microsoft, which had taken over Nokia's plant.

a power purchase agreement for 25 years for the project that has been awarded under Jawaharlal Nehru National Solar Mission phase II batch II tranche I.

Defence manufacturing could be India's biggest job spinner: Modi

Prime Minister Narendra Modi has said that defence manufacturing could be the biggest job spinner in the country, as the government is focusing on manufacturing arms and equipment at home.

Speaking to *Wall Street Journal*, the Prime Minister said that India needs to be very bullish about defence manufacturing, because this is not merely a strategic decision as the country's defence imports are quite high. India is the world's largest importer of arms, accounting for 14 per cent of global purchases.

Reliance Defence receives 16 new licences

The wholly-owned subsidiary of Reliance Infrastructure Ltd, Reliance Defence Ltd, has received 16 industrial licences to manufacture

a wide array of high-technology equipment ranging from small arms, heavy weapons, armoured vehicles, ammunition, explosives, electronic warfare systems, missiles, UAVs, directed energy weapon systems, laser systems for target destruction and C4I systems for all defence platforms.

HAL, BEL to develop airborne communication systems

Hindustan Aeronautics Ltd (HAL) has signed an MoU with Bharat Electronics Ltd (BEL) for making advanced airborne communication and electronic warfare systems.

T. Suvarna Raju, CMD, HAL, said in a press release to the media, "The umbrella understanding includes sharing of expertise in design, development, engineering and manufacturing between HAL and BEL to develop and produce advanced airborne communication and electronic warfare systems, etc."

Samsung Electronics to acquire USA based Cloud services firm Joyent

South Korean electronics giant, Samsung, is looking to acquire USA based Cloud computing firm Joyent Inc. to boost its Cloud computing and Internet of Things abilities. The financial details of the planned deal are not yet disclosed.

The company said in a statement that the acquisition will help it strengthen its Cloud-related infrastructure and services.

The company has been very active in making acquisitions in recent years, including the purchase of LoopPay in 2015, seeking to bolster its software and services capabilities.

David Eun, president of Samsung's Global Innovation Centre, has said that the company is working with startups to bring new software and services into Samsung.
