

Engineered to generate signals having Accuracy and Precision

GA148X Series RF Signal Generator (3GHz / 4GHz)

GA148X Series is a high-end signal generator designed and manufactured to create high frequency and stable signals capable of testing your very best devices and designs. It offers industry-leading performance, features and low cost of ownership.

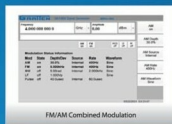

GA148X Series generate the essential signals for parametric and functional testing of components and 3 GHz+ receivers. Frequency range extends from 250 kHz up to 4 GHz.

The performance of the signal generator is called the benchmark of similar products in the market and they can meet your demands for design and manufacturing. An ideal instrument for the educational labs to high-end R&D labs.

Features

- 250 kHz to 4GHz/3GHz frequency range with resolution 0.1Hz
- Superior Phase Noise $\leq -115\text{dBc/Hz}$ @ 20kHz (Carrier wave 1GHz) : GA1484B
 $\leq -105\text{dBc/Hz}$ @ 20kHz (Carrier wave 1GHz) : GA1484A
 $\leq -115\text{dBc/Hz}$ @ 20kHz (Carrier wave 1GHz) : GA1483
- $-127 \sim +13\text{dBm}$ amplitude output range with 0.01 dB resolution
- Extensive Analog modulation: AM, FM, Phase and Pulse Modulation
- Hard keys on the front panel and soft keys on the unit's screen, provide fast and intuitive user experience

Model Spec	GA1483	GA1484B	GA1484C	GA1484A
Frequency range	250kHz~3GHz		250kHz~4GHz	
Resolution		0.1Hz		
Power range		$-127 \sim +13\text{dBm}$ (Available to -136dBm)	$-15\text{dBm} \sim +17\text{dBm}$	$-110 \sim +13\text{dBm}$
Resolution		0.01dB		
SSB phase noise		$\leq -115\text{dBc/Hz}$		$\leq -105\text{dBc/Hz}$
Harmonics		$\leq -30\text{dBc}$		

Other Products

Vector Network Analyzers | Function Generators | Handheld Scopes | RF Probes | Power Supplies | RF Training Kits
