Zebronics introduces speakers

Engineered to be the focal point for a stereo or home theatre system

Captain Tower Speakers with Bluetooth functionality offer incredible power, depth and precision for detailed music sessions and high-impact home cinema experiences. Featuring dynamic transducers—dual 16.5cm bass drivers for lows

and quad 7.6cm drivers for mids and highs—the speakers fill even the largest room with energy and excitement.

The speakers cover a wide spectrum of audio frequencies that include everything from low-bass to high frequencies with thumping-heart bass audio effect and a built-in amplifier with wider dispersion of sound. Featuring 50W RMS power capacity, the speakers can take everything you can give these and more.

Kingston launches SSD

Enabling true hard disk drive replacement

UV400 SSD from Kingston allows fast boot times, application loading and file transfers for mainstream users. It is powered by a four-channel controller for speeds up to 550MB/s read and 500MB/s write, and is ten times faster than a 7200rpm hard disk drive (HDD). UV400 SSD is rugged and more durable than a mechanical hard drive as it is shock and vibration resistant, making it more reliable for use in notebooks and other mobile computing devices.

It is available as a stand-alone drive or as a bundled kit with all the accessories needed [(6.35cm (2.5-inch) USB enclosure for notebooks and 8.9cm (3.5-inch) adaptor for desktops, SATA cable and Acronis data-migration software download coupon)] for easy do-it-yourself installation. UV400 SSD comes in 120GB and 240GB capacities and will soon be available in 480GB and 960GB capacities.

HyperX launches gaming headset

Wider audio range that creates depth and width for improved audio precision

HyperX, a division of Kingston Technology, has launched Cloud Revolver, which is the newest addition to its Cloud headset family. It features a studio-grade sound stage with 50mm directional drivers to deliver wider depth and width for improved audio precision in first-person shooter and open environment games. Tuning of the driver, mechanical design of the front acoustical chamber, larger ear cups and exhaust vents allow users to hear an opponent more clearly from further away and gain the ultimate competitive advantage.

HyperX Cloud Revolver uses signature red memory foam and premium leatherette on-ear cups and head band to provide comfort and quality for long hours of game play. The steel frame suspension design provides long-lasting durability, stability and quality. Its detachable noise-cancelling microphones offer crisp, clean and clear voice quality and reduced background noise. It is multi-platform compatible (PC, console and mobile device) and is certified by TeamSpeak and Discord.
