

FOR YOUR LITTLE EINSTEINS

Visha entered into the venture in 1978 to satisfy market needs for business of electronic components, addressing diverse clientele of Industrial Suppliers, Small Scale Manufacturers, Product Developers at the same time amateurs and hobbyists. It caters to everybody, from the eager 8yr olds to hearty 80yr olds!

Our contribution in the world of electronics includes innovative range of products like the Electronic Components & Tools, DIY Kits, Sensors and Modules. We support the Engineering Industry & College by providing them absolute solutions catering to almost all of their immediate requirements.

NJOYE

Think 3D, Create 3D

Would you believe if I say, 'what you imagined can now be actualized.' Let us introduce you to the new high-tech design software and the revolutionary 3D printer. Now, the engineers and the future engineers sit back and relax while our machine does all the work!

These kits inspire the students and encourage them to think out-of-the-box!

JoyTronics

Connecting the textbook to reality, it features experiments with varying difficulty levels. It can explain different concepts of physics especially those focusing on electronics in simplified and playful way. These plug and play kits are available in different volumes ranging from 10 to 2000 experiments.

My Robot Time 3

Who doesn't like robots? My Robot Time 3 is our educational hobby kit that supports children to explore the area of Robotics. It helps children to assemble different models using plastic blocks and also learn about compilation of GUI programming at the advanced stages.
