

almost any surface, from glass to wood to a leaf. To detach, the power supply is simply switched off.

The entire mechanism weighs 13.4mg, bringing the total weight of the robot to about 100mg—similar to that of a real bee.

Underwater robot to combat terrorism

Saab, a Swedish aerospace and defence company, has invented a remotely-operated vehicle known as Sea Wasp. This artificial-intelligence-powered robot, which relocates, identifies and neutralises underwater improvised explosive

Sea Wasp can help countries strengthen their national security needs with an underwater, anti-IED device to keep EOD teams safe

devices (IEDs), has been designed to combat below-the-surface terrorism.

According to Bert Johansson, sales director of Underwater Systems within Saab business area dynamics, "Sea Wasp is a hybrid of pre-existing Saab technologies that can now be applied to an urgent worldwide need. Underwater explosive ordnance disposal (EOD) is a rapidly-growing niche around the world, and Sea Wasp's capabilities correspond to that niche."

Currently, most underwater IED threats are disposed of manually by trained EOD divers. Sea Wasp is operated remotely by two-people teams, allowing for a safe distance between operators and IEDs.

Insoles to improve balance

Wyss Institute and Boston University researchers have discovered that random vibrations, too gentle to be felt, can improve the sensory feedback system and may restore stability through a mechanism known as stochastic resonance. By incorporating vibrating elements in insoles and foot-

BINAY - Lighting Up The Future

BINAY LED-based HIGH, MEDIUM and LOW Intensity Aviation Obstruction Light Beacons

As per International Civil Aviation Organisation (ICAO) requirements Available in Low Intensity, Medium Intensity and High Intensity versions (as per International Civil Aviation Organization guidelines), BINAY's patented LED Aviation Lights come with 5-year/3-year warranties

LED Obstruction Lighting for:

- Industrial chimneys and smokestacks
- Transmission, microwave and cellular towers
- Radio, TV and similar structural towers
- High-rise buildings and structures
- Airports and airfields

THE BINAY LED Aviation Obstruction Light offers the following advantages:

- Fit-and-forget maintenance-free operation
- A long life of 100,000 hours (20 years at 12 hours daily burning)
- Pays for itself within a short period of operation in the form of reduced installation, maintenance and servicing costs
- Quick Installation; Reliable operation 365 days per year
- Shock-proof and vibration-resistant
- Over-Designed Intensity to allow for natural LED Intensity degradation over its operating lifetime

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT
