

The Best Value in Electronic Test & Measurement

LOW COST, EXCELLENT PERFORMANCE, EASY OF USE

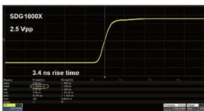

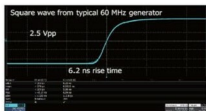

SDG1000X Series

Function/Arbitrary Waveform Generator Coming...

- Innovative EasyPulse technology, solves the weaknesses inherent in traditional DDS generators
- Special circuit for Square wave function, can generate Square waves up to 60 MHz
- Plenty of analog and digital modulation types: AM, DSB-AM, FM, PM, FSK, ASK, PSK and PWM
- Harmonics Generator function
- Waveform Combining function

Product Model	SDG1062X	SDG1032X
Bandwidth	60 MHz	30 MHz
Sampling rate	150 MSa/s	
Vertical resolution	14-bit	
Waveform Length	16 kpts	
Num. of channels	2	
Max. amplitude	±10 V	
Display	4.3" display, 480 x 272 x RGB	
Interface	Standard: USB Host, USB Device, LAN Optional: GPIB (USB-GPIB adaptor)	

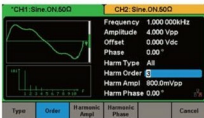

High performance Square Waves

Benefiting from special square wave-generating circuitry, the square wave output from the SDG1000X breaks the 60 MHz frequency barrier, achieving rise/fall times of less than 4.2 ns and frequencies up to 60 MHz.

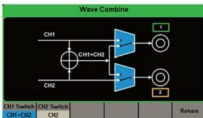

Identical dual output-channels with high performance

Capable of outputting large amplitude signals on both channels and at high frequencies, 20 Vp-p amplitude is guaranteed up to 10 MHz.

Harmonics Function

Up to 10 orders of harmonics may be generated. Amplitude and phase of each harmonic can be independently set.

Waveform Combining

The SDG1000X is capable of internally combining the waveforms from both channels, therefore providing even more output flexibility.
