FLIR EX-Series

Thermal imaging camera for fast electrical and
mechanical inspections

FLIR EX-Series cameras are point-and-shoot thermal imaging cameras that give you access to a new dimension. A FLIR EX-Series camera is an affordable replacement for a spot pyrometer. It provides a thermal image with temperature information on every pixel. Electrical and mechanical problems can be spotted fast and accurate.

With an EX-Series thermal imaging camera, you can see internal fuse damage, locate electrical problems, inspect electrical cabinets, check bearings, find motor problems, prevent down time and production loss.

All EX-Series are equipped with FLIR's patented Multi Spectral Dynamic Imaging (MSX) feature.
