

USEFUL WEBSITES

VIRTUAL REALITY

Virtual reality (VR) is an emerging trend in computer science. It is a simulation that replicates an object such that it can be explored and interacted with by a human.

This month we present a few websites discussing VR

Compiled by **NIRAJ SAHAY**

freevr.org

The site is the home for FreeVR, an open source VR interface/integration library. It has been designed to work with a wide variety of input and output hardware, with many device interfaces already implemented.

The site has complete documentation and tutorial on FreeVR.

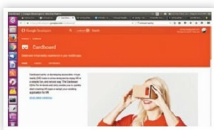

www.freevr.org/tutorials.html

vrtalk.com

VRtalk is a forum for discussing anything and everything about VR. The website has 1224 threads and 5635 posts with 608 members. Apart from general discussions on the topic, the site includes a section on VR hardware and headsets.

vrtalk.com/forum

developers.google.com

Google Cardboard aims at developing accessible VR tools that allow everyone to enjoy VR in a simple, fun and natural way. Cardboard SDKs for Android and Unity enable you to quickly start creating VR apps or adapt your existing applications for VR. The site is primarily aimed at developers who are interested in VR.

learnsauce.com

Tutorials on this site can work as a guide to create awesome VR games and simulations. It has a comprehensive tutorial on how to get started with 3D modelling, game development, game programming, Blender, Unity and integrating your project to Oculus Rift for an interesting VR experience.

learnsauce.com/virtualrealitytutorial/#offers

unity3d.com

You can create any 2D or 3D game with Unity. You can make it highly-optimised and beautiful with ease. It is something that can be of interest to developers interested in VR, too. The site has tutorials on developing VR platforms and other articles with VR Samples projects.
