

ARM® Computer on Modules: Low on power, high on performance!

Powered by: • NVIDIA® Tegra • NXP®/Freescale i.MX 6 & i.MX 7 • NXP®/Freescale Vybrid

BUILDING INDUSTRIAL AUTOMATION PRODUCTS? PARTNER WITH THE BEST!

RUGGED & COMPACT EMBEDDED COMPUTING PLATFORM – SYSTEM ON MODULE

Guaranteed 10+ years' availability
for extended product life

Flawless operation in harsh
ambient conditions

Extensive I/Os for multiple
sensor monitoring

Reduce power consumption
with power-efficient platforms

Ideal for building HMI, PLC, Data Loggers, Remote Monitoring System, and many more

HMI Reference Design available:

- Reduce time-to-market by using proven reference design
- Design available as open-source
- Isolated MODBUS, CAN, RS232, Digital I/Os
- Add-on: Wi-Fi, Bluetooth

3rd Floor, LXY Aura, 99/D, KHB Colony, Koramangala, 5th Block, Bangalore-560095, India
