

Get ready for the widest IoT market ecosystem

4000 possible combinations of STM32 and STM8 MCUs and SX127x radios

THE BRAIN

Choose from basic, ultra-low-power or highly performance with STM8 (8-bit) or STM32 (32-bit) MCUs. Pick from a portfolio that offers from 2 Kbytes up to 2 MB Flash, 14-pin up to 216 pins with tiny form factor packages, and a rich set of analog and connectivity peripherals.

COMMUNICATION

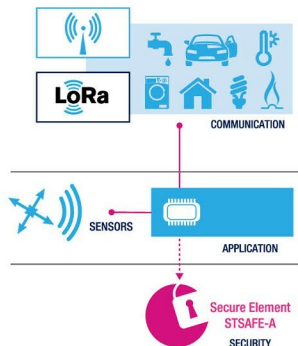

Choose the appropriate LoRa radio matching your application needs. Add short range connectivity with NFC and Bluetooth.

SECURITY

STSAFE A is a turnkey solution for the IoT. Optimized for small platforms, state of the art security relying on CC EAL5+ HW, the STSAFE A allows easy integration using libraries compatibles with standard MCUs.

SENSING

Add sensing capabilities to your application with environmental, motion and proximity sensors.

HARDWARE TOOLS AND STACK

STM32 Nucleo boards, SX1276MB1xAS LoRa® expansion board

STM32 Open Development Environment

STMicroelectronics Pvt Ltd, Plot No 1, Knowledge Park III, Greater Noida 201308, Uttar Pradesh, India
