

Government working on plans to encourage growth of electronics manufacturing units

The government of India is working on a three-pronged approach to encourage the growth of electronics manufacturing units and make Make in India initiative a success.

The first is a shift towards a long-term policy horizon so that the policy path is known and the end user has clarity in what is in store for the industry. Second, the taxation regime is to be made stable, and third, to put in place all support schemes.

“While electronics manufacturing has an advantage of a large consumer base, we have fallen behind in the

production of components, which remains a challenge,” said Aruna Sharma, secretary, government’s Department of Electronics and Information Technology (DeitY), at a conference on Championing Manufacturing in India.

Vinod Sharma, managing director, Deki Electronics, said that the electronics industry has a promising future, provided the problems characterised by 3Cs are addressed. These pertain to high cost of operation like finance, energy and logistics, complex and discretion-based policy regime that leads to high transaction costs, and corruption.

Intel, Odisha government to join hands for ESDM sector growth

USA based semiconductor chip maker Intel Corp. is likely to enter into an alliance with Odisha government to bring in investments to the state in the electronic system design and manufacturing (ESDM) sector.

The state government is pulling out all stops to promote investments in the ESDM sector. Also, with Bhubaneswar ranked as the number one smartcity, Intel can offer its technical expertise. The giant has also expressed its keenness to improve the efficiency of servers and hardware clusters like state data centres.

Chhattisgarh government inks three MoUs in electronics sector

Chhattisgarh government has signed a memoranda of understanding (MoU) with three companies in the electronics sector.

The three electronics companies are SDSL Electronics Pvt Ltd, Liger Electronics Pvt Ltd and Beesons. All three will be setting up LED manufacturing units in the electronics manu-

facturing cluster that is coming up at Naya Raipur.

Combined, the three companies will be investing around ₹ 600 million in the state. With Make in India initiative gaining momentum, there are numerous states offering SOPs for companies willing to set up manufacturing units.

On The Move

Appointments at IESA

India Electronics and Semiconductor Association (IESA) has announced executive council for FY 2016-17. K. Krishna Moorthy will now serve as chairman, Ashwini K. Aggarwal as vice chairman of IESA and Anilkumar Muniswamy as treasurer.

Ziox Mobiles appoints Deepak Kabu as CEO
