Digital clampmeters

1080-TRMS is a 3½-digit, 6000 counts clampmeter with a current range

up to 1200A AC and DC, auto/manual-ranging digital with LCD backlight having voltage range up to 1000V DC and 750V AC, and a jaw-opening size of 30mm. Basic accuracy for DC voltage is $\pm 0.5\% \text{rdg} + 3 \text{dgt}$ and for AC voltage $\pm 0.8\% \text{rdg} + 5 \text{dgt}$, for DC current $\pm 0.8\% + 10 \text{dgt}$ and for AC current $\pm 2.0\% \text{rdg} + 30 \text{dgt}$.

In addition, it has special features like auto power off, resistance, capacitance, frequency, duty cycle, temperature, diode test, audible continuity, data hold and so on.

Spot thermal camera

FLIR TG167 spot thermal camera bridges the gap between single-spot infrared thermometers

and FLIR's legendary thermal cameras. Equipped with FLIR's exclusive Lepton micro-thermal sensor, TG167 lets you see the heat so you know where to reliably measure it. Designed for indoor electrical inspection, TG167 will help you easily find unseen hot and cold spots in electrical cabinets or switch boxes, giving you quality image detail on even small connectors and wires. Then, you can store images and download

data to show customers and include in reports.

Solar power meter

Model KM-SPM-530 is a new solar power meter. It has features like solar power measurement with orientation

and tilt angles, 4-digit triple display, auto ranging, auto power off with disable function and LCD backlight display, max/min/avg and data hold, low-battery indication function, zero adjustment, over-range indication function and others.

All-in-one transport tester

Anritsu has introduced a one-button test capability for its next-generation Network Master Pro MT1000A and Network Master Flex MT1100A all-in-one

transport tester platforms that simplifies the end-to-end process of installing and maintaining the quality of high-speed core and metro networks. With the new capability, operators can more easily implement their own testing procedures and ensure these are enacted by field technicians who can complete jobs more quickly based on predefined requirements to reduce test time and costs while improving quality.

AC clamp meter

Hioki has announced the launch of AC clamp meters 3280-10F (with mean-value rectification) and 3280-20F (with true-RMS measurement). Key features of the products are:

- Ability to make measurements in confined locations easily with a flexible current sensor
- Broader operating temperature range for use in more environments

COMPONENTS

IGBTs

ON Semiconductor has introduced a new series of insulated gate bipolar transistors (IGBTs) that utilise its proprietary Ultra Field Stop trench technology. NGTB40N120FL3WG, NGTB-25N120FL3WG and NGTB40N120L-3WG are designed to deliver elevated levels of operational performance in order to meet the exacting demands of modern switching applications.
