

USEFUL WEBSITES

DO-IT-YOURSELF

This month we have for you a few websites that would help you try your hands on different types of do-it-yourself projects

Compiled by **NIRAJ SAHAY**

instructables.com

Instructables was officially spun out of Squid Labs in the summer of 2006, and has gone on to grow from a modest hundreds of projects to over 100,000. The community that now calls the site its home is an amazing mix of wonders from around the world. Instructables is a website specialising in user-created and uploaded do-it-yourself projects, which other users can comment on and rate for quality.

doityourself.com

DoItYourself.com, founded in 1995, is a leading independent home improvement and repair website. It is mainly divided into three sections: How-Tos, Forums and Did It Myself. Did It Myself section has projects on various topics and includes a dedicated section called Electrical & Electronics. You may freely link to this site, and use it for non-commercial use, subject to terms and conditions of use.

Today DoItYourself averages over five million unique visitors per month.

fixya.com

This site has solutions for nearly everything. In 2005, too, many product manufacturers were neglecting post-purchase customer support. Frustrated by the lack of practical post-purchase information, entrepreneur Yaniv Bensadon set out to build a community resource capable of providing relevant and up-to-date troubleshooting data. Today, FixYa continues to empower individuals to repair and improve upon their already-purchased possessions. From fixing cars to cameras and iPhones, FixYans are part of a do-it-yourself revolution that helps empower techies, tinkers and hobbyists across the globe.

builditsolar.com

www.builditsolar.com

The site helps you with plans, tools and information to help you build renewable energy and conservation projects. The site has reference to hundreds of projects, from changing a light bulb to building a solar home. The best part is that the website does not have anything for sale. *builditsolar.com* also features a list of renewable energy discussion forums, where you can discuss your project-related issues.
